Categories: Auscultation

Product Description

Good clean 16-sound list, but there's a shared MPN worth flagging — and several typos to quietly fix.

[Cert] Item No. 1018177 [W49425], 0.07 kg, 16×7×2 cm, MPN listed as "ST2M-142 – Breath," compatible with W49407. [Guessing] Notice the base number ST2M-142 is identical to Basic Murmurs Sound Menu (ST2M-142 – Murmurs) from two products ago — two completely different 16-sound cards sharing one MPN root, differentiated only by a trailing word. That could be a genuine Nasco convention (sub-variants under one catalog number) or a copy-paste error somewhere upstream in your product data. Worth a quick check with your OEM rep, since MPN collisions can cause ordering mix-ups on the distributor side even if the WordPress listings themselves are fine.

[Cert] The source list has three clear typos I'm correcting rather than treating as ambiguous: "Plueral" ? pleural, "Pulmonmy" ? pulmonary, and "course" ? coarse (matching the spelling used consistently on your other breath-sound cards, e.g., the W44119 lung condition list).

Why Choose the Breath Sounds Sound Menu for Your Simulation Lab in India?

The Breath Sounds Sound Menu (Item No. 1018177 / W49425, MPN: ST2M-142, 0.07 kg, 16 × 7 × 2 cm) by Nasco Healthcare, USA is a 16-sound respiratory auscultation card for the W49407 simulator, covering the full range of normal and pathological lung sounds needed for a complete respiratory examination curriculum.

The card progresses from normal breath sound types (tracheal, vesicular, bronchovesicular, bronchial) through adventitious sounds — wheezes, monophonic wheeze, pleural friction rub, stridor, cavernous breathing, and fine, rhonchi, and coarse crackles — and closes with clinically significant findings like pulmonary edema, infant breath sounds, egophony, and pectoriloquy. This gives students exposure to the full spectrum of respiratory findings tested in clinical examinations, from routine to rare.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and auscultation training accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Which simulator is this compatible with? A: The W49407 auscultation simulator by Nasco Healthcare. Confirm compatibility before ordering.

Q: How does this complement the ACLS and murmur cards? A: All are 16-sound cards for the same W49407 unit, so a lab building a comprehensive auscultation library can combine cardiac, murmur, and respiratory cards on one shared base simulator.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
