**SKU:**

**Categories:**Airway Management Adult

## Product Description

This detailed adult intubation head comes mounted for clinical teaching and practice of advanced airway management. Intubation procedures and skills, including anatomy knowledge and recognition, endotracheal intubation, nasotracheal intubation, use of field emergency airway adjunct tubes like LMAs and Combitube, securing, and suctioning, and maintenance of the installation can all be practiced with this unit.

**Why Choose the Life/form® Economy Adult Airway Management Trainer for Your Simulation Lab in India?**

The Life/form® Economy Adult Airway Management Trainer (Item No. 101-500 / 1005780) by Nasco Healthcare, USA is a 3.8 kg adult male intubation head mounted on a board — the most cost-effective configuration in the Life/form® Airway Management Trainer range, designed for rescue airway and

advanced airway management training with a specific device scope. From the family comparison table, it supports suctioning and LMA and Combitube® insertion, with durable one-piece construction and bifurcated lungs for bilateral auscultation. For NMC-mandated simulation labs, nursing colleges, and paramedic training institutes in India that need an affordable, durable adult airway management platform for LMA and Combitube® technique training and airway anatomy familiarisation, this is the correct entry-level choice. The package includes a soft carry bag, lubricant, and instructions for use.

The durable construction withstands high-frequency training use in classroom settings, and the bifurcated lung provides reliable bilateral auscultation confirmation of correct tube placement. The airway anatomy presents the landmarks necessary for correct LMA and Combitube® insertion and suctioning technique training. The limitation versus other configurations in the Life/form® Airway Management Trainer family is clearly defined: this trainer does not support ET tube insertion, digital intubation, EOA, PTL, or King Systems devices — those are supported from the standard Airway Larry configurations upward. It does not include laryngospasm, tongue oedema, stomach rise, jaw thrust, or manual carotid pulse. For programmes where LMA and Combitube® insertion alongside suctioning cover the full training requirement, the Economy configuration delivers those capabilities at the lowest cost point in the range. For programmes requiring the full advanced airway device set, the standard Life/form® Airway Management Trainer with Stand (1005633 / LF03699U) is the appropriate upgrade.

**Why Buy from SEM Trainers?** SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

**Frequently Asked Questions**

**Q: Does this trainer support ET tube insertion?** A: No. The Economy Adult Airway Management Trainer supports LMA and Combitube® insertion and suctioning only. ET tube, EOA, PTL, and King Systems insertion are available from the standard Life/form® Airway Management Trainer configurations upward.

**Q: What is the difference between this and the standard Life/form® Airway Management Trainer with Stand (1005633)?** A: The 1005633 supports the full advanced airway device set — ET, EOA, PTL, LMA, EGTA, Combitube®, and King Systems — plus digital intubation, jaw thrust, and suctioning. The 101-500 supports LMA and Combitube® only, with suctioning. It is the correct choice where LMA/Combitube® training is the sole requirement and budget is a constraint.

**Q: What is the warranty and how do I get support?** A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.

Delivery with soft carry bag, lubricant and instructions for use.

| | Head/torso | Ideal for | Digital intubation | Laryngospasm & Tonge edema | Stomach rise | Sucti-oning | Jaw thrust | Manual carotid pulse | E.T., E.O.A., P.T.L, L.M.A., Combitube®, and King System insertion | Additional features |
