## Product Description

TruCric is a lightweight and durable cric trainer for efficient teaching and training in needle and surgical

cricothyrotomy, percutaneous tracheostomy, air jet ventilation and the Seldinger technique.

#### Model Features

- Lightweight and durable cricothyrotomy trainer designed for efficient procedure training
- Palpable cricoid landmarks, laryngeal cartilages & tracheal rings provide positive user feedback with easy identification of the sternal notch & the clavicle bone
- Correct technique verification with replaceable lung bag
- Neck skin can be rotated on the model allowing 10-15 incisions
- Larynx insert allows 1 surgical cricothyroidotomy & 2-3 tracheostomy procedures
- All consumables are quick & easy to interchange, perfect for a busy teaching environment

#### Medical Procedure Training

- Needle & surgical cricothyrotomy
- Air jet ventilation
- Percutaneous tracheostomy
- Seldinger technique
- FONA airway management

**Surgical Cricothyrotomy Trainer** Real -Feel skin covering & palpable cricoid landmarks for realistic training. TruCric facilitates training in needle and surgical cricothyrotomy, percutaneous tracheostomy, Seldinger technique and air jet ventilation. Anatomically accurate and palpable landmarks include tracheal rings, laryngeal cartilages, cricoid and cricothyroid membrane for realistic practice in front of neck access techniques. Our TruCric model is a durable front of neck access trainer facilitating realistic practice in FONA airway management, including needle and surgical cricothyroidotomy, and percutaneous tracheostomy. It’s ideal for efficient training including emergency and anaesthesia clinicians needing to maintain proficiency in emergency front of neck airway techniques. TruCric provides efficient surgical airway management training ideal for busy classroom settings and as a surgical airway demonstration model. Book a free demonstration today or ask us about custom pricing for high-volume orders.

#### REPLACEABLE PARTS & CONSUMABLES FOR EFFICIENT TRAINING

TruCric comes with a carrier case, lubrication, replacement lung bag, 10 larynx inserts and 2 wrap around neck skins. The neck skin can be rotated on the model allowing 10-15 incisions, while the larynx insert can facilitate 1 surgical cricothyroidotomy and 2-3 tracheostomy procedures. All parts are quick and easy to interchange, perfect for a busy teaching environment. Best-Selling TruCric consumables:

- Wrap around neck skin attachments (pack of 5)
- Larynx inserts (pack of 50)
- Trucorp® lubrication (100ml)

Super Saver Pack with 5% discount:

- Super Saver Cric Training Pack (100 Procedures)

**THE WORLD'S MOST ADVANCED CRICOTHYROTOMY TRAINING MANIKINS**

TruCorp has designed several cricothyrotomy training manikins for cricothyrotomy training plus intubation, lung isolation, laryngoscopy, BVM and many other procedures:

**Why Choose the TruCric for Your Simulation Lab in India?**

The TruCric (Item No. TCRIC1 / 1021893) by TruCorp®, Ireland is a 1.682 kg dedicated standalone Front of Neck Access (FONA) trainer — purpose-built for efficient, high-throughput training in needle and surgical cricothyrotomy, percutaneous tracheostomy, air jet ventilation, the Seldinger technique, and FONA airway management. Unlike the AirSim® Combo X (CTC91100X), which adds FONA capability to a full intubation head, the TruCric is a neck-only platform with no airway management component — making it the correct choice when the exclusive training objective is surgical airway technique, and when maximising procedure throughput per training session is an operational requirement. At 1.682 kg it is the most portable and most rapidly deployable FONA trainer in the TruCorp range. For ATLS training centres, anaesthesia skills labs, emergency medicine departments, and NMC-mandated simulation labs in India running dedicated cric training sessions, this is purpose-built for that use case.

The anatomical landmark set is the clinical training foundation: palpable cricoid landmarks, palpable laryngeal cartilages, and palpable tracheal rings — all correctly positioned relative to the sternal notch and clavicle — provide the surface anatomy that clinicians must identify before making a FONA incision under time pressure. The Real-Feel skin covering delivers the correct tissue resistance and surface compliance that calibrate the clinician's blade and needle technique. The wraparound neck skin rotates on the model, providing 10–15 incision sites per skin before replacement — enabling multiple trainees to practise consecutive procedures without interruption. Each larynx insert supports one surgical cricothyrotomy and 2–3 percutaneous tracheostomy procedures. A replaceable lung bag confirms correct placement with ventilation response. All consumables interchange in seconds, making the TruCric the correct platform for back-to-back class rotations. Package includes: carrier case, TruCorp lubrication, one adult lung bag, 10 larynx inserts (1 attached, 9 spare), and 2 wraparound neck skins (1 attached, 1 spare).

**Why Buy from SEM Trainers?** SEM Trainers & Systems is an authorized distributor of TruCorp® products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions

across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

**Frequently Asked Questions**

**Q: What is the difference between the TruCric and the AirSim® Combo X (CTC91100X)?** A: The TruCric is a dedicated standalone FONA trainer with no intubation or airway management capability — it is optimised for high-throughput cric training only. The AirSim® Combo X adds FONA capability to a full intubation head, supporting both intubation and surgical airway training on the same platform. Choose TruCric when FONA training volume and throughput are the sole objectives; choose Combo X when combined intubation and FONA training is required.

**Q: How many procedures does each consumable support?** A: Each wraparound neck skin supports 10–15 incision sites before replacement. Each larynx insert supports one surgical cricothyrotomy and 2–3 percutaneous tracheostomy procedures. 10 larynx inserts and 2 neck skins are included in the standard package.

**Q: What is the warranty and how do I get support?** A: TruCorp® products carry a manufacturer warranty. For support in India, contact SEM Trainers at sem@semtrainers.com or +91-88495 63724.

**Package Contents**

- 1 Carrier case
- 1 Bottle of TruCorp® lubrication
- 1 Adult lung bag
- 10 Larynx inserts (1 attached & 9 spare)
- 2 Wrap around neck skins (1 attached & 1 spare)

**Parts & Accessories**

- Super Saver Cric Training Pack
