Categories:ALS Child

Product Description

For use with Infant CRiSis™ Manikins (1005658, 1018146 and 1017248). Caution: Use only Life/form® Replacements. Do not use conventional latex tubing. This will cause malfunctioning of the simulator.
Why Choose the Life/form® Bone Replacement Kit for Infant CRiSis™ for Your Simulation Lab in India?

The Life/form® Bone Replacement Kit for Infant CRiSis™ (Item No. LF01109U) by Nasco Healthcare, USA is the genuine OEM replacement intraosseous bone insert kit for the Life/form® Infant CRiSis™ Manikins (compatible with Item Nos. 1005658, 1018146, and 1017248). The IO tibial bone insert is the consumable component of the infant IO training module that provides the critical cortical resistance trainees must penetrate during intraosseous needle placement practice — the tactile feedback that

distinguishes correct technique from incorrect force application and angle in a neonatal patient.

Neonatal and infant IO access is among the highest-stakes procedural skills in paediatric resuscitation. The tibial IO site in an infant is significantly smaller and the cortical bone proportionally thinner than in older children and adults — which means the margin between correct technique and dangerous misplacement is narrower, and the skill is correspondingly more dependent on trained muscle memory. Trainees who practise on a worn bone insert that no longer accurately represents infant cortical resistance are calibrating against the wrong feedback profile, with direct consequences for skill transfer to real patients. Replacing the bone insert regularly with genuine OEM LF01109U material restores the correct resistance, correct landmark geometry, and correct tactile profile of the Infant CRiSis™ IO module. **Important safety notice:** Nasco Healthcare explicitly cautions that only genuine Life/form® OEM replacement components must be used with Infant CRiSis™ Manikins — conventional latex tubing or non-OEM substitutes will cause malfunction of the simulator.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and genuine OEM consumables to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: Which Infant CRiSis™ simulators is this bone replacement kit compatible with? A: LF01109U is compatible with Life/form® Infant CRiSis™ Manikins Item Nos. 1005658, 1018146, and 1017248 by Nasco Healthcare.

Q: Can non-OEM bone inserts or latex tubing substitutes be used? A: No. Nasco Healthcare explicitly prohibits the use of non-OEM replacement components or conventional latex tubing — doing so will cause malfunction of the Infant CRiSis™ simulator. Only genuine LF01109U OEM kits must be used.

Q: How do I order and get support from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724. We supply genuine Nasco Healthcare consumables with pan-India delivery.
