Categories:ALS Newborn

Product Description

NENAsim series is an extremely realistic neonatal human patient simulator, with set ups for different training purposes such as Basic Patient Care, Basic Life Support, Advanced Life Support as well as advanced medical scenario and treatment training.

The NENAsim Infant ALS with Basic Software, Girl (Item No. 1021105 | MPN: MXNENAINALSS2) is an exceptionally realistic neonatal human patient simulator designed for comprehensive infant Advanced Life Support (ALS) training. Weighing 2.1 kg and measuring 50 x 45 x 23 cm, this simulator features lifelike silicone skin, realistic anatomy, and flexible limbs, making it one of the most true-to-life infant training manikins available.

This model supports a wide range of training scenarios including patient care procedures, realistic airway management, intubation, oxygen delivery, head tilt/chin lift/jaw thrust techniques, and blood circulation vital signs monitoring. The included Basic Software provides CPR performance feedback, making it ideal for both basic and advanced neonatal life support training. It is perfectly suited for medical colleges, nursing institutes, neonatal ICUs, and simulation labs looking to deliver high-quality, scenario-based infant ALS training.

Q1. What is the NENAsim Infant ALS with Basic Software used for? It is used for neonatal Advanced Life Support (ALS) training, covering patient care, airway management, intubation, oxygen delivery, CPR techniques, and blood circulation vital signs monitoring.

Q2. What makes NENAsim stand out from other infant simulators? NENAsim features extremely realistic anatomy, life-like silicone skin, and flexible limbs as standard, offering one of the most realistic and immersive infant simulation experiences available for medical training.

Q3. What does the Basic Software provide? The Basic Software offers real-time CPR performance feedback, enabling trainees to assess and improve their resuscitation techniques during training sessions.

Q4. What training procedures are supported by this simulator? It supports patient care procedures, realistic airway management, intubation, oxygen delivery, head tilt/chin lift/jaw thrust maneuvers, and blood circulation vital signs monitoring.

Q5. Is a boy version of this simulator also available? Yes, a boy version is available under Item No. 1021104. The NENAsim series is available in multiple configurations including Infant Care, Infant ALS, ALS with Basic Software, and Human Patient Simulator (HPS).

Q6. What are the dimensions and weight of this simulator? The simulator measures 50 x 45 x 23 cm and weighs 2.1 kg, making it easy to handle and transport for simulation lab use.

Q7. Who should use this simulator? It is ideal for medical colleges, nursing institutes, neonatal ICUs, pediatric departments, and healthcare simulation centers focused on newborn and infant ALS training.

Q8. Where can I purchase this in India? You can enquire and order through SEM Trainers at **+91-88495 63724**

or **+91-98791 03905**, or visit semtrainers.com.

Realistic anatomy, life-like silicone skin and flexible limbs are standard features of NENAsim.
