Categories: Decubitus Care

Product Description

Add realism while practicing patient assessment skills, including observation of swelling of the foot. Edema simulation can be practiced by pressing on the surface of the skin. The foot uses lifelike simulated tissue pads to demonstrate Stages 1+ through 4+, as well as a non-pitting stage of edema known as brawny edema. Pressing on the surface of the skin may leave an indentation that does not immediately rebound when pressure is released, or it may not indent under pressure, depending on which tissue pad is placed in the foot. A Deep Tissue Injury is also present on the heal. Includes a foot that easily attaches to any GERi™ or KERi™ Patient Care Manikin, five interchangeable pads

representing one non-pitting stage and four pitting stages of edema, and an instruction key card.
Optional Edema Foot, GERi/KERi (LF04084U)

The Optional Edema Foot (Item No. LF04084U) by Nasco Healthcare, USA adds realism to patient assessment training by simulating swelling of the foot, letting trainees practice edema assessment by pressing on the surface of the skin.

Five interchangeable pads for a full range of edema presentations. The foot uses lifelike simulated tissue pads to demonstrate pitting edema Stages 1+ through 4+, plus a non-pitting stage known as brawny edema. Depending on which pad is placed in the foot, pressing on the skin may leave an indentation that doesn't immediately rebound when pressure is released, or it may not indent at all under pressure — matching how each stage presents clinically.

A Deep Tissue Injury is also present on the heel, adding another realistic assessment point beyond edema alone.

Easily attaches to GERi™ or KERi™ manikins. Comes complete with a foot that easily attaches to any GERi™ or KERi™ Patient Care Manikin, five interchangeable pads (one non-pitting and four pitting edema stages), and an instruction key card.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: How many edema stages does this foot simulate? A: Five total — four pitting edema stages (1+ through 4+) plus one non-pitting (brawny edema) stage, via interchangeable tissue pads.

Q: What manikins is it compatible with? A: Any GERi™ or KERi™ Patient Care Manikin.

Q: What's included? A: The attachable foot, five interchangeable tissue pads, and an instruction key card.
