SKU:

Categories: Adult Patient Care

Product Description

The Hungry Manikin® Paediatric Trainer helps parents, carers, and healthcare staff safely practise nasogastric and gastrostomy feeding in children. With transparent anatomy, fluid aspiration, pH testing, and visible tube placement, it builds confidence in measuring, inserting, and managing feeding tubes, ensuring safer care and enhanced understanding of paediatric enteral feeding.

Skills

- This model was designed by nutrition nurses at Birmingham Children's Hospital to demonstrate to parents/carers the technique for inserting nasogastric and gastrostomy tubes in children
- This simple to use simulator helps identify the stages of placement, ensuring that the nasogastric device is passed safely and correctly.
- This child manikin enables parents/carers to visualise the correct positioning of nasogastric and gastrostomy tubes and also practise the associated techniques
- Families have reported that The Hungry Manikin gave them invaluable practice and increased their confidence and understanding.
- Measurement, placement and securement of nasogastric tube
- Insertion of gastrostomy tube
- As the manikin accepts fluids, training in the following procedures is now possible:
    - Aspiration of the stomach for confirming correct tube placement
    - Measuring pH (acidity/alkalinity) of stomach aspirate
    - Enteral feeding via nasogastric or gastrostomy tubes
    - Administration of liquid based medicines

Features

- The Hungry Manikin has been significantly **improved** so that fluids can be introduced into the stomach
- The transparent cover is now removable and, by means of a simple connector, the stomach can be removed for cleaning
- Movable epiglottis to demonstrate swallowing
- Transparent body – allowing trainees to observe the tube being passed
- Divided nasal septum
- Gastrostomy opening
- Representation of lungs and oesophagus

2 Year Guarantee

- This model, manufactured by Adam,Rouilly, comes with a 2 Year Guarantee. This guarantee applies to models which have been used correctly and covers durability and functionality.

Includes

- Instruction manual
- Rigid carrying case

The Hungry Manikin® – Paediatric Nasogastric Feeding Trainer (AR331)

The Hungry Manikin® Paediatric Trainer (Item No. AR331) by Adam Rouilly, UK helps parents, carers, and healthcare staff safely practise nasogastric and gastrostomy feeding in children. With transparent anatomy, fluid aspiration, pH testing, and visible tube placement, it builds confidence in measuring, inserting, and managing feeding tubes.

Designed by clinicians, for real caregiver confidence. This model was designed by nutrition nurses at Birmingham Children's Hospital to demonstrate to parents and carers the technique for inserting nasogastric and gastrostomy tubes in children. Families have reported that The Hungry Manikin gave them invaluable practice and increased their confidence and understanding.

Identifies each stage of correct placement. This simple-to-use simulator helps identify the stages of placement, ensuring the nasogastric device is passed safely and correctly, while letting parents and carers visualize correct positioning and practice the associated techniques themselves.

Skills trained: measurement, placement, and securement of nasogastric tube; insertion of gastrostomy tube; and — since the manikin accepts fluids — aspiration of the stomach for confirming correct tube placement, measuring pH (acidity/alkalinity) of stomach aspirate, enteral feeding via nasogastric or gastrostomy tubes, and administration of liquid-based medicines.

Significantly improved for realistic fluid handling. The Hungry Manikin has been upgraded so fluids can be introduced into the stomach, and the transparent cover is now removable — by means of a simple connector, the stomach can be removed for cleaning.

Realistic anatomical features, including a movable epiglottis to demonstrate swallowing, a transparent body allowing trainees to observe the tube being passed, a divided nasal septum, a gastrostomy opening, and a representation of the lungs and oesophagus.

Please note: size 8 Fr Nasogastric and size 12 Fg Ryles tubes should be used with this model.

Comes complete with: an instruction manual and a rigid carrying case. Backed by a 2-year guarantee covering durability and functionality for models used correctly.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of Adam Rouilly

products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What tube sizes should be used with this model? A: Size 8 Fr Nasogastric and size 12 Fg Ryles tubes.

Q: What's the warranty? A: A 2-year guarantee, covering durability and functionality for models used correctly.

Q: What's included? A: An instruction manual and a rigid carrying case.
