Categories: Human Skull Models

Product Description

Anatomical model of a skull of a young male. This one-part microcephalic skull has an alveolar abscess of the right maxilla with the canine tooth suspended in the abscess. The molars exhibit severe attrition. This human microcephalic skull model is a natural cast and includes 27 teeth.

- High-quality original casts
- Microcephalic skull is handmade of hard, unbreakable plastic
- Highly accurate representation of the fissures, foramina, processes, sutures etc.

This microcephalic skull model is an accurate anatomical replica of microcephalic human and is great for teaching and learning about medical malformations of the human skull.
