SKU:

Categories: Human Skull Models

Product Description

3B Scientific's range of anthropological skulls has been newly reissued in its entirety. The results are plain to see. The La Chapelle-aux-Saints skull model is the finest casting produced from scientifically made copies of specimens featured in the collection at the Institute of Anthropology and Human Genetics for Biologists at the Johann-Wolfgang-Goethe University, Frankfurt/Main, Germany. This means that all the details in each anthropological skull can be reproduced absolutely accurately. This unique La Chapelle-aux-Saints replica is supplemented by having it displayed on a pedestal that contains a relief map of the geographical area where the specimen was found.

Cast from a reconstruction of the La Chapelle-aux-Saints skull, the model skull is an accurate replica

of one belonging to a 50-55 year old male Neanderthal from ancient Europe of the species Homo (sapiens) neanderthalensis. Early man.

Discovered at: southern France
Discovery: 1908
Age: approx. 35,000 to 45,000 years
Dimensions approx. 22x16x22.5 cm³
Weight: approx. 0.9 kg

This La Chapelle-aux-Saints skull replica is a great tool for teaching and learning the anatomy of early human species.
