SKU:

Categories:3B NEUROteacher™, Brain Models

Product Description

On 21 pages with over 60 detailed illustrations the 3B NEUROtables™ reveal the human brain in various views and sectional layers. The anatomical structures of the individual illustrations are numbered and named on each page. The 3B NEUROtables™ offer optimal support for neurological anatomy: for studies, exam preparations and even in the dissecting room (since they are washable). They are also an optimal supplement for the software products 3B NEUROteacher™ and 3B NEUROtrainer™. The NEUROtables are a great study aid, like flash cards. Studying the central nervous system and the anatomy of the human brain is made easy. The 3B NEUROtables™ cover the following areas:

- Brain (overview)

- Spinal medulla, brain stem, brain stem center & cerebellum
- Diencephalon (overview & sections)
- Cerebrum (cerebral cortex, limbic system and basal ganglia)
- Cerebral nerves (I-XII & N. trigeminus)
- Vessels & ventricular system
- Functional systems (somatomotor, somatosensory, olfactory, optic, vestibular & acoustic systems)

Printed on size A4, tear-resistant, washable plastic with spiral binding.

3B NEUROtables™ in French (S0290) — Comprehensive Neuroanatomy Reference & Study Aid

The 3B NEUROtables™ in French (Item No. 1002494 [S0290], 0.25 kg) by 3B Scientific, Germany reveal the human brain in various views and sectional layers across 21 pages with over 60 detailed illustrations, with anatomical structures numbered and labeled in French on each page.

Built for study, exams, and the dissecting room. The 3B NEUROtables offer optimal support for neurological anatomy — for coursework, exam preparation, and even hands-on use in the dissecting room, since they're fully washable and won't be ruined by everyday lab use.

Pairs naturally with digital study tools. The tables are also an optimal supplement for the software products 3B NEUROteacher™ and 3B NEUROtrainer™, and function like a set of flash cards, making the study of the central nervous system and brain anatomy more approachable.

Comprehensive coverage across seven key areas: brain overview; spinal medulla, brain stem, brain stem center & cerebellum; diencephalon (overview and sections); cerebrum (cerebral cortex, limbic system, and basal ganglia); cranial nerves (I–XII & N. trigeminus); vessels and ventricular system; and functional systems (somatomotor, somatosensory, olfactory, optic, vestibular & acoustic).

Durable, classroom-ready format. Printed on A4-size, tear-resistant, washable plastic with spiral binding, built to withstand repeated handling in both classroom and lab settings.

Ideal for French-medium institutions or programs teaching neuroanatomy in French, offering the same comprehensive content as the English edition in a fully French-language format.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of 3B Scientific products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Is this edition entirely in French? A: Yes — all anatomical labels and text are in French, covering the same content as the English edition.

Q: Can these tables be used in the dissecting room? A: Yes — they're printed on tear-resistant, washable plastic specifically so they can withstand dissecting room use.
