SKU:

Categories:Men's Health Education

Product Description

Self-examination of the testicles is just as important as self-examination of the female breasts for early detection of tumors. Providing exceptional realism, this simulator features soft, thin outer skin with delicate underlying structures and four embedded, simulated tumors. Ideal for teaching proper palpation techniques. To maintain the lifelike feeling of the skin, baby powder (included) should be applied from time to time.

Testicle Self-Examination Model (Nasco Healthcare) for TSE Training in India

The Testicle Self-Examination Model (Item No. LF01143U, Weight 0.5kg, Dimensions 23.5 x 16 x 6.5cm, Make: Nasco Healthcare, USA) trains testicular self-examination technique — a screening method just as important for early tumor detection as breast self-examination is for women.

The model features soft, thin outer skin over delicate underlying structures, with four embedded simulated tumors for palpation practice. This makes it well suited for teaching proper self-examination technique across a range of findings. Baby powder (included) should be applied periodically to maintain the lifelike feel of the skin over repeated use.

Specifications: Dimensions 23.5 x 16 x 6.5cm. Weight 0.5kg.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying health education and self-examination training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

FAQ

Q: How many simulated tumors does this model contain? A: Four embedded tumors for palpation practice across a range of findings.

Q: How do I maintain the model's realistic feel? A: Apply the included baby powder periodically to the skin surface.

Q: How do I order from SEM Trainers? A: Contact sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
