SKU:

Categories: Parenting Education

Product Description

Cast from a child's mouth, this hinged model shows that the sugars that coat a baby's mouth while sleeping with a bottle can cause dental disease. Model measures 2¼" x 15/8" x 2". Comes with a coordinating tear pad. The 8 ½" x 11" tear pad is English on one side and Spanish on the other and has 100 sheets per pad.

Baby Bottle Tooth Decay Model for Parenting & Infant Health Education in India

The Baby Bottle Tooth Decay Model (Item No. 1018302 [W43157], Brand: WRS Group) is cast from an actual child's mouth, giving parents and caregivers a realistic, hinged model that shows how sugars left coating a baby's mouth during bottle-feeding at sleep time can lead to dental decay.

The compact model makes an otherwise abstract risk immediately visible and concrete, supporting parent education sessions on infant oral hygiene. It comes with a coordinating tear pad for take-home reinforcement, with practical guidance printed in English on one side and Spanish on the other.

Specifications: Model 2¼" x 1" x 2". Tear pad 8½" x 11", 100 sheets. [DIMENSIONS FIELD ON SITE SHOWS 0x0x0 — NEEDS CORRECTION BEFORE PUBLISHING]

Why Buy from SEM Trainers? SEM Trainers & Systems has supplied medical simulation and health education equipment to 1,500+ institutions across 28 Indian states for over 30 years, with pan-India delivery and dedicated after-sales support.

FAQ

Q: What does this model demonstrate? A: How sugars coating a baby's mouth during bottle-feeding, especially at sleep time, can lead to dental decay — using a model cast from an actual child's mouth.

Q: What comes with the model? A: A coordinating tear pad for take-home patient education, 100 sheets per pad.

Q: How do I order from SEM Trainers? A: Contact sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
