## Product Description

This model serves as a graphic reminder to parents of the damaging tooth decay that can occur if a baby or young child is put to bed with a bottle of juice, breastmilk, formula, or any other liquid containing sugar. Mounted on plastic base. 10½" x 3½" x 3½".

**Progression of Baby Bottle Tooth Decay Display for Parenting & Infant Oral Health Education in India**

The Progression of Baby Bottle Tooth Decay Display (Item No. 1018298 [W43141], Brand: WRS Group) is a compact, mounted teaching aid designed to remind parents of the real dental damage that can occur when a baby or young child is put to bed with a bottle of juice, breastmilk, formula, or any

other sugar-containing liquid.

The display's purpose is straightforward and visual: giving parent-education sessions a concrete, memorable prompt rather than relying on verbal warnings alone. Mounted on a plastic base for easy tabletop or counter display in a clinic, classroom, or health education setting.

**Specifications:** 10½" x 3½" x 3½", mounted on plastic base. Weight 0.953kg. [DIMENSIONS FIELD ON SITE SHOWS 0x0x0 — NEEDS CORRECTION BEFORE PUBLISHING]

**Why Buy from SEM Trainers?** SEM Trainers & Systems has supplied medical simulation and health/parenting education equipment to 1,500+ institutions across 28 Indian states for over 30 years, with pan-India delivery and dedicated after-sales support.

## FAQ

Q: What does this display remind parents of? A: The dental damage that can result from putting a baby or young child to bed with a bottle containing juice, breastmilk, formula, or other sugary liquids.

Q: How is the display mounted? A: On a plastic base, suitable for tabletop or counter display.

Q: How do I order from SEM Trainers? A: Contact [sem@semtrainers.com](mailto:sem@semtrainers.com) or call +91-88495 63724 for pricing and availability.
