Product Description

Patients and students learn the importance of blood pressure checks when they see these handpainted, 3-D models of arteries and this cross section of the brain. Demonstrates the way high blood pressure can silently lead to heart attacks or strokes. Comes with protective felt cover. 9" x 12".

Why Blood Pressure Checks Can Save Your Life Easel Display for Cardiovascular Health Education in India

The Why Blood Pressure Checks Can Save Your Life Easel Display (Item No. 1018289 [W43119], Brand: WRS Group) uses hand-painted 3-D models of arteries alongside a cross-section of the brain to show patients and students why routine blood pressure checks matter.

The display makes visible how sustained high blood pressure can silently damage arteries over time, ultimately leading to heart attack or stroke — connecting a routine screening measurement to its most serious downstream consequences in a way that's immediately understandable. The display comes with a protective felt cover for storage between uses.

Specifications: Easel size 9? x 12?. Weight 0.8kg. [DIMENSIONS FIELD ON SITE SHOWS 0x0x0 — NEEDS CORRECTION TO 9"x12" BEFORE PUBLISHING]
