SKU:

Categories:Diabetic Teaching Tools

Product Description

Made from realistic BIOLIKE material, these teaching models facilitate technique practice on both an injection skin and a finger stick apparatus. The skin model may be strapped to the user's arm or leg to simulate a needle injection site, and the finger stick model may be held by the attached grip for lancet practice. Both can be punctured repeatedly. Replacement skin for the skin model and replacement finger are available. Comes with powder and carrying case. Skin model is 6" x 4 ½" x 1 ½", and finger stick model is 1" x 4 ½" x 1".

Diabetic Injection Practice Kit — Beige (W43123BE)

The Diabetic Injection Practice Kit — Beige (Item No. 1018139 [W43123BE], 0.81 kg) by WRS Group is

made from realistic BIOLIKE™ material, giving patients and students a complete practice set covering both the two core self-monitoring skills diabetic patients need: injection technique and finger-stick blood glucose testing.

Two practice components in one kit. The injection skin model can be strapped to the user's arm or leg to simulate a realistic needle injection site, while the finger stick model can be held by its attached grip for lancet practice — covering both major hands-on skills in a single kit rather than requiring separate purchases.

Built for repeated, durable practice. Both components can be punctured repeatedly, and replacement skin for the skin model and a replacement finger are available separately — extending the kit's usable life well beyond a single set of consumable parts.

What's included: injection skin model (6" × 4½" × 1½"), finger stick model (1" × 4½" × 1"), powder, and a carrying case.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What skills does this kit cover? A: Both insulin injection technique (via the strap-on skin model) and finger-stick blood glucose testing (via the grip-held finger model).

Q: Can worn-out parts be replaced? A: Yes — replacement skin for the skin model and a replacement finger for the finger stick model are available separately.

Q: What's included in the kit? A: The injection skin model, finger stick model, powder, and a carrying case.
