Product Description

This life-size diabetic foot model can be used for both patient education and student training. Made from BIOLIKE™ material, the model contains three ulcers in various stages of development as well as the features commonly associated with diabetes. A graphic reminder of the importance of proper foot

care. Comes with a carrying case and instruction card.

Diabetic Foot Model (W43107) — Life-Size Foot Care Education for Patients & Students

The Diabetic Foot Model (Item No. 1017936 [W43107], 2.5 kg) by WRS Group is a life-size model built for both patient education and student training, giving a realistic, tactile way to understand diabetic foot complications and the importance of proper foot care.

Realistic ulcer progression for genuine clinical understanding. Made from BIOLIKE™ material, the model contains three ulcers in various stages of development, along with the features commonly associated with diabetes — letting students and patients see how foot complications progress if not properly managed, rather than working from a single static example.

A graphic reminder that reinforces the message. The visible progression of ulcer stages makes this an effective tool for driving home the real-world importance of proper foot care in diabetic patients — often more impactful than verbal counseling alone.

Comes ready for classroom or clinical use, supplied with a carrying case and instruction card for easy transport and reference.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: How many ulcer stages are shown? A: Three ulcers in various stages of development, along with features commonly associated with diabetic foot complications.

Q: Is this suitable for direct patient education, not just classroom teaching? A: Yes — it's specifically designed for both patient education and student training.

Q: What's included? A: The life-size foot model, a carrying case, and an instruction card.
