Product Description

This lifesize, BIOLIKE™ replica complements the original Diabetic Foot Model (W43107) by showing additional, more severe consequences of diabetes, including an amputated toe. Charcot foot

deformity, and severe infection and gangrene. Comes with a carryinc case and instruction card.

Severe Diabetic Foot Model (W43107A) — Advanced-Stage Diabetic Complications Teaching Tool

The Severe Diabetic Foot Model (Item No. 1017937 [W43107A], 1.205 kg) by WRS Group is a life-size, BIOLIKE™ replica that complements the original Diabetic Foot Model (W43107) by showing additional, more advanced consequences of uncontrolled diabetes.

Advanced-stage complications for comprehensive clinical education. The model depicts an amputated toe, Charcot foot deformity, and severe infection and gangrene — giving students and clinicians a realistic view of what can result when diabetic foot complications go unmanaged, complementing the earlier-stage ulcer progression shown in the standard Diabetic Foot Model.

Designed to pair with the standard model for a complete teaching set. Institutions that already carry the original Diabetic Foot Model can use this severe-complications version alongside it to show the full spectrum of diabetic foot disease — from early ulceration through advanced, irreversible tissue damage — reinforcing why proactive foot care matters.

Comes ready for classroom or clinical use, supplied with a carrying case and instruction card.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: How does this differ from the standard Diabetic Foot Model? A: This model shows more advanced, severe complications — including an amputated toe, Charcot foot deformity, and severe infection and gangrene — while the standard model shows earlier-stage ulcer progression.

Q: Should these be purchased together? A: Many institutions purchase both to demonstrate the full spectrum of diabetic foot disease progression, from early ulceration through advanced complications.

Q: What's included? A: The life-size foot model, a carrying case, and an instruction card.
