SKU:

Categories:Diabetic Teaching Tools

Product Description

The Type II Diabetes Set includes miniature brain, eye, heart, kidney, artery, pancreas, neuron, and foot models. Education card illustrates effects associated with Type II Diabetes: stroke, ocular pathology, hypertensive heart disease, hardening of the kidney, hardening of the arteries, insulin

resistance, neuropathy, and foot ulcerations. Model display stands 10" tall. Models are reduced size

- Model size: 10" Tall
- Base: 8.8 x 6.25"

Type II Diabetes Set (W33386) — Multi-Organ Systemic Effects Teaching Display

The Type II Diabetes Set (Item No. 1019573 [W33386], 1.1 kg) includes miniature brain, eye, heart, kidney, artery, pancreas, neuron, and foot models — giving students and patients a comprehensive, organ-by-organ view of how Type II diabetes affects the entire body, not just blood sugar.

Eight organ systems, one systemic story. Rather than teaching diabetes as an isolated condition, this set connects it to the specific complications it causes across the body: stroke (brain), ocular pathology (eye), hypertensive heart disease (heart), hardening of the kidney (kidney), hardening of the arteries (artery), insulin resistance (pancreas), neuropathy (neuron), and foot ulcerations (foot) — an included education card ties each miniature model to its associated complication.

Compact display format for classroom or office use. The full model display stands 10" tall on an 8.8" x 6.25" base, with reduced-size models throughout — making it practical to keep on display in a classroom, clinic, or counseling office without needing significant space.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Which organs are included in this set? A: Miniature brain, eye, heart, kidney, artery, pancreas, neuron, and foot models — eight organ systems affected by Type II diabetes.

Q: Does it explain how each model relates to diabetes? A: Yes — an included education card illustrates the specific complication associated with each organ, from stroke risk to foot ulcerations.

Q: How big is the display? A: 10" tall on an 8.8" x 6.25" base — compact enough for classroom, clinic, or office display.
