Consequences of Drug Abuse, 3D Info Board (W43054) — Hand-Painted Organ Damage Teaching Display

The Consequences of Drug Abuse, 3D Info Board (Item No. 1005583 [W43054], 4.828 kg) by WRS Group features detailed boards with hand-painted models clearly showing the consequences of drug abuse on the body's organs — a companion piece to the Consequences of Alcoholism board, covering

the drug-abuse side of substance abuse education.

Hand-painted realism for stronger visual impact. Rather than relying on printed illustrations alone, this info board uses hand-painted 3D models to depict organ damage, giving students and patients a more tangible, memorable representation of drug abuse's physical effects.

Ready for the classroom. Brief explanations in English accompany the models, making the board ideal for direct use in lessons without requiring additional instructor preparation. The board comes in a carry-case for easy transport and storage between sessions.

Size: approx. [confirm — 71 × 34 cm per spec table vs. 71 × 68 cm² per description text; these don't match].

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What does this board show? A: Hand-painted 3D models depicting the consequences of drug abuse on the body's organs, with brief English explanations for classroom use.

Q: Does this pair with the alcoholism info board? A: Yes — many institutions purchase both together for comprehensive substance abuse education covering alcohol and drugs.

Q: Is it portable? A: Yes — it comes with a carry-case for easy transport and storage.
