**SKU:**

**Categories:** Drug and Alcohol Education

## Product Description

**A New Dimension in Courses to Explain the Dangers of Drink Driving** The state of being drunk and how that affects vision and co-ordination can be extremely effectively, realistically and intensely simulated by wearing these goggles. Young people in particular will unavoidably become aware of the danger that comes from drinking and driving. Supplied with case.

### Goggles for Simulating Drink Driving (W43041) — Realistic Impaired Vision & Coordination Simulation

The Goggles for Simulating Drink Driving (Item No. 1005576 [W43041], 0.09 kg) by WRS Group offer a new dimension in courses explaining the dangers of drink driving, letting wearers effectively, realistically, and intensely simulate the state of being drunk and how that affects vision and

coordination.

**A visceral, hands-on way to teach a serious message.** Rather than only telling students about the dangers of drinking and driving, these goggles let them directly experience the visual and coordination impairment involved — making the danger unavoidably real, particularly for young people in driver education or health awareness programs.

**Practical classroom tool.** Lightweight and compact, the goggles are supplied with a case for easy transport and storage between sessions.

**Why Buy from SEM Trainers?** SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

### Frequently Asked Questions

Q: What effect do the goggles simulate? A: They simulate the impaired vision and coordination associated with being drunk, giving wearers a realistic, hands-on sense of drink-driving impairment.

Q: Who is this suited for? A: Driver education programs, school health awareness sessions, and community outreach — particularly effective for young audiences.

Q: What's included? A: The goggles and a carrying case.
