Categories: Women's Health Education

Product Description

This Trainer combines modularity and practicality for clinical skills in diagnosis and palpation.

- Four identifiable anatomical anomalies.

- Fluid filled cyst for aspiration and palpation
- 2 palpable lumps (approx. 1 cm and 1.5cm diameter) on the lateral side of the breast
- Infection in Armpit in axilla region
- Lump in tissue above the clavicle
- Modular design for simple replacement of skin, cyst, lump axillary gland
- Skin detaches for replacing cysts
- Realistic tactile feel
- Easy to keep clean

Clinical Breast Trainer for Women's Health Education in India

The Clinical Breast Trainer (Item No. 1005159 [W19340]) [BRAND: NOT LISTED — CONFIRM BEFORE PUBLISHING] combines modularity and practicality for teaching clinical diagnosis and palpation skills.

The trainer includes four identifiable anatomical anomalies: a fluid-filled cyst for aspiration and palpation practice, two palpable lumps (approximately 1cm and 1.5cm in diameter) on the lateral side of the breast, an infection presentation in the axilla, and a lump in tissue above the clavicle. The modular design allows simple replacement of the skin, cyst, lump, and axillary gland components individually, with the skin detaching for cyst replacement specifically — extending the trainer's usable life well beyond a fixed, single-configuration model. Realistic tactile feel and easy to keep clean.

Features: 4 anatomical anomalies (cyst, 2 lumps, axillary infection, supraclavicular lump), modular replaceable components, detachable skin.

Specifications: Dimensions 33 x 25 x 15cm. Weight 4kg.

Why Buy from SEM Trainers? SEM Trainers & Systems has supplied medical simulation and women's health education equipment to 1,500+ institutions across 28 Indian states for over 30 years, with pan-India delivery and dedicated after-sales support.

FAQ

Q: What clinical findings can be practiced with this trainer? A: A fluid-filled cyst, two palpable lumps of different sizes, an axillary infection presentation, and a supraclavicular lump.

Q: What makes the modular design useful long-term? A: Skin, cyst, lump, and axillary gland components can each be replaced individually, extending the trainer's usable life.

Q: How do I order from SEM Trainers? A: Contact sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
