Categories: Women's Health Education

Product Description

Demonstrate realistic self-examination with our natural casting of a female upper body with medium sized breasts. It can easily be worn, in order to better train and practice breast self-examination. • Made of new 3B SKINlike™ high-quality silicone • Displays the skin in finest detail • Very realistic to the touch and dermatologically tested • Breast examination is possible in both upright or lying positions • Benign

and malignant tumors in different stages of development hone self-examination skills

- 2 benign tumors
- 4 malignant tumors
- 2 typical anomalies

- Supplied with talcum powder, harness and stand

Wearable Breast Self Examination Model (L51)

The Wearable Breast Self Examination Model (Item No. 1000343 [L51], 6.5 kg) by 3B Scientific, Germany is a natural casting of a female upper body with medium-sized breasts, designed to be worn for realistic self-examination training and practice.

Premium silicone for genuinely realistic touch. Made of 3B SKINlike™ high-quality silicone, the model displays skin in finest detail and is dermatologically tested — giving trainees a tactile experience close to real skin rather than a generic rubber texture.

Practice in real-world positions. Because the model is worn, breast examination is possible in both upright and lying positions, matching how self-examination is actually performed rather than restricting practice to a single fixed posture.

Eight distinct findings for comprehensive practice. Benign and malignant tumors in different stages of development hone self-examination skills: 2 benign tumors, 4 malignant tumors, and 2 typical anomalies — giving trainees a wide range of findings to practice identifying and distinguishing.

Comes ready for immediate use, supplied with talcum powder, a harness, and a stand.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of 3B Scientific products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: How many different findings does this model include? A: Eight — 2 benign tumors, 4 malignant tumors, and 2 typical anomalies, all in different stages of development.

Q: Can it be worn during practice? A: Yes — the model is designed to be worn using the included harness, and supports examination in both upright and lying positions.

Q: What's included? A: The wearable model, talcum powder, a harness, and a stand.
