HIV Model (3B Scientific) for Sex Education in India

The HIV Model (Item No. 1000336 [L40], Brand: 3B Scientific) shows the Human Immunodeficiency Virus enlarged millions of times, with the outer lipid membrane, protein structures, and internal nucleus containing the viral RNA all clearly visible.

The nucleus is removable, and a condom can be placed underneath it — turning the model into a direct visual teaching aid for HIV protective measures, not just an anatomy display. No sex education course is complete without covering HIV, and this model gives it the concrete, structural presence it deserves rather than treating it as an abstract warning. Mounted on a base for easy display. Delivered without condoms.

Specifications: Dimensions 18 x 13 x 13cm. Weight 0.73kg.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of 3B Scientific products in India with over 30 years of experience supplying anatomical models and sex education equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

FAQ

Q: What does this model show? A: The HIV virus enlarged millions of times, including the outer lipid membrane, protein structures, and a removable nucleus containing the viral RNA.

Q: How does the model support protection education? A: A condom can be placed underneath the removable nucleus, connecting the anatomical display directly to protective measures.

Q: How do I order from SEM Trainers? A: Contact sem@semtrainers.com or call +91-88495 63724 for pricing and availability.

TIP: You will also receive access to a **free 3-day trial to all premium features** of the Complete

Anatomy app when you sign up for your 3B Smart Anatomy course. To unlock these benefits, simply scan the label located on your model and register online. All 3B Smart Anatomy features are **completely free of charge** for you. [Click here](#) to learn more. This model of the Human Immunodeficiency Virus, enlarged millions of times, shows the outer lipid membrane with protein structures and the internal nucleus which contains the viral hereditary matter (RNA). The nucleus is removable and condoms can be put underneath to provide a message regarding measures to take in protecting against HIV. No sex education course is complete without talking about HIV, the deadly sexually transmitted disease. The AIDS virus is mounted on base for easy display. Delivered without condoms. 3B Smart Anatomy explained in 90 seconds:
