Categories:Heart Health and Fitness Education

Product Description

These handpainted, cross-sectional, 3-D models of arteries show patients and students the various stages of plaque build up. The interior size of each vessel diminishes, making it easy to explain a process that can eventually result in death. Comes with protective felt cover. 9" x 12".

Death of An Artery Easel Display (W43121) — Cross-Sectional Plaque Buildup Progression Model

The Death of An Artery Easel Display (Item No. 1018290 [W43121], 0.779 kg) by WRS Group features handpainted, cross-sectional 3-D models of arteries showing patients and students the various stages of plaque buildup.

A visual progression that makes the danger clear. The interior size of each vessel diminishes across the sequence, making it easy to explain a process that can eventually result in death — turning an abstract concept like "arterial plaque buildup" into a concrete, visible progression students and patients can immediately understand.

Compact and protected for easy use. At 9" × 12", the easel display is compact enough for desk or countertop use, and comes with a protective felt cover to keep the models safe between sessions.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What does this display show? A: Cross-sectional models of arteries showing progressive stages of plaque buildup, with the vessel interior visibly narrowing across the sequence.

Q: Is it protected for storage and transport? A: Yes — it comes with a protective felt cover.

Q: What size is the display? A: 9" × 12".
