Product Description

Life-size, 3D, hand-painted models illustrate the various organs that can be affected by high blood pressure. Great for health fairs and health-education promotions. Contained in a convenient, sturdy wooden carrying case.

Consequences of High Blood Pressure 3D Display (W43081) — Life-Size Hand-Painted Organ Impact Display

The Consequences of High Blood Pressure 3D Display (Item No. 1018277 [W43081], 4.8 kg) by WRS Group features life-size, 3D, hand-painted models illustrating the various organs that can be affected by high blood pressure — giving viewers a striking, tangible sense of hypertension's real health impact.

Life-size scale for maximum visual impact. Unlike smaller tabletop displays, this display uses life-size models, making the health message more immediate and memorable — particularly effective for public-facing events where grabbing attention matters.

Purpose-built for outreach and events. This display is great for health fairs and health-education promotions, giving organizations a durable, visually striking centerpiece for public health awareness campaigns.

Durable, portable housing. Contained in a convenient, sturdy wooden carrying case for easy transport and protection between events.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What does this display show? A: Life-size, hand-painted 3D models illustrating the organs affected by high blood pressure.

Q: Is this suitable for public health events? A: Yes — it's specifically designed for health fairs and health-education promotions, housed in a sturdy wooden carrying case for easy transport.
