Product Description

Human Heart Model, 2-times Life-Size, 4-part — 3B Smart Anatomy

The Human Heart Model, 2-times Life-Size, 4-part (Item No. 1000268 [G12], 0.656 kg) by 3B Scientific, Germany allows very easy identification of all anatomical structures in the human heart, making it a perfect aid for lessons in big classrooms or lecture halls.

Double the size for maximum visibility. At twice life-size, this model is specifically built for group teaching situations where a standard-size heart model would be too small for students at the back of the room to see clearly.

Open it up for the most detailed view available. The atrium walls and the front heart wall are removable, revealing the most professionally detailed and realistic heart available — giving students a genuinely thorough look at internal cardiac structure, not just a surface overview.

Hand-painted for genuine anatomical accuracy. The model is hand-painted in lifelike colors to depict dozens of items of anatomical interest in the human heart, helping students distinguish specific structures clearly rather than working from a uniform, uncolored model.

Includes free 3B Smart Anatomy digital access. Every original 3B Scientific model includes free access to the 3B Smart Anatomy course, hosted inside the Complete Anatomy app by 3D4Medical — featuring 23 digital anatomy lectures, 117 virtual anatomy models, and 39 anatomy quizzes, plus a free warranty upgrade from 3 to 5 years upon product registration.

Comes on a removable stand for flexible display and handling.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of 3B Scientific products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Why is this model twice life-size? A: It's specifically designed for large classrooms and lecture halls, where a standard-size heart model would be difficult for students at a distance to see clearly.

Q: Can the model be opened for internal detail? A: Yes — the atrium walls and front heart wall are removable, revealing detailed internal structure.

Q: Is it mounted on a stand? A: Yes — a removable stand is included.
