Product Description

Classic Human Heart Model, 2-part — 3B Smart Anatomy

The Classic Human Heart Model, 2-part (Item No. 1017800 [G08], 0.49 kg) by 3B Scientific, Germany is a highly detailed human heart model at a price you'll love — slightly smaller than life-size, with exquisite anatomical detail throughout.

Open it up for a genuine inside view. The front heart wall is detachable, revealing the chambers and valves inside the human heart — giving students a clear look at internal cardiac structure alongside external anatomy.

A great foundational model for standard heart anatomy teaching. Unlike the bypass variant of this model, this version focuses on clean, standard cardiac anatomy — well suited for introductory anatomy and physiology courses where bypass surgery detail isn't the focus.

Includes free 3B Smart Anatomy digital access. Every original 3B Scientific model includes free access to the 3B Smart Anatomy course, hosted inside the Complete Anatomy app by 3D4Medical — featuring 23 digital anatomy lectures, 117 virtual anatomy models, and 39 anatomy quizzes, plus a free warranty upgrade from 3 to 5 years upon product registration.

Comes with a stand for flexible display and handling.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of 3B Scientific products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Can the model be opened to show the internal chambers? A: Yes — the front heart wall is detachable, revealing the chambers and valves inside.

Q: How does this differ from the Classic Human Heart Model with Bypass? A: This version shows standard cardiac anatomy without the color-coded bypass grafts included on the bypass variant — better suited for introductory teaching.

Q: Is it mounted on a stand? A: Yes — a stand is included.
