Product Description

Patients and students learn the importance of blood pressure checks when they see these handpainted, 3-D models of arteries and this cross section of the brain. Demonstrates the way high blood pressure can silently lead to heart attacks or strokes. Comes with protective felt cover. 9" x 12".
Why Blood Pressure Checks Can Save Your Life Easel Display (W43119) — Artery & Brain Cross-Section Display

The Why Blood Pressure Checks Can Save Your Life Easel Display (Item No. 1018289 [W43119], 0.8 kg) by WRS Group helps patients and students learn the importance of blood pressure checks through handpainted, 3-D models of arteries paired with a cross-section of the brain.

Two connected consequences in one display. Rather than showing arterial damage in isolation, this display demonstrates the way high blood pressure can silently lead to both heart attacks and strokes — connecting cardiovascular and cerebrovascular risk in a single, clear visual narrative that reflects how hypertension actually threatens health.

Compact and protected for easy use. At 9" × 12", the easel display is compact enough for desk or countertop use, and comes with a protective felt cover to keep the models safe between sessions.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What does this display show? A: Handpainted 3-D artery models alongside a brain cross-section, demonstrating how high blood pressure can silently lead to heart attacks or strokes.

Q: Is it protected for storage and transport? A: Yes — it comes with a protective felt cover.

Q: What size is the display? A: 9" × 12".
