Product Description

Circumcision is a surgical procedure performed to remove the loose tissue, known as the foreskin, covering the glans of the penis. This worldwide procedure is performed for health, religious, or cultural reasons shortly after birth, around puberty, or during young adulthood. The World Health Organization (WHO), the Joint United Nations Program on HIV and AIDS (UNAIDS), and the Center for Disease Control (CDC) state evidence that indicates male circumcision significantly reduces the risk of female-to-male HIV transmission by over 50%. The Circumcision Trainers have been developed with the assistance from one of the top medical schools in Wisconsin, USA, as well as medical professionals in South Africa and Indonesia. The trainers include the foreskin, glans penis, frenulum, meatus, and coronal groove. These trainers are made with soft, lifelike material, which is pliable, delicate, and realistic to the touch. Medical students, physicians, and other practitioners can learn, practice, and

improve realistic, hands-on skills for this delicate procedure without the worry of learning on a live patient. Practice simulating dorsal block injection, separating the inner lining of the foreskin (preputial epithelium) from its attachment to the glans, surgical removal of the foreskin, and suturing techniques. These trainers may also be used to demonstrate the procedure and practice aftercare skills to family members. Since there are different methods of circumcision, the Circumcision Trainers have been designed for Mogen clamp method, Guillotine clamp method, Gomco clamp method, Plastibell method, dorsal slit method, forceps guided method, and sleeve circumcision. The Pre-Teen Circumcision Training Kit is a complete kit for all circumcision training needs. Includes one base, six glans penis cores, six foreskins, instruments (scalpel, 4-1/2" micro-forceps, 6" precision probe, Iris research scissors, 5" straight Halstead mosquito forceps, 5" curved Halstead mosquito forceps, Ethicon suture thread with needle), instrument case, instructions, and soft nylon carrying case.

Pre-Teen Circumcision Training Kit for Surgical Skills Training in India

The Pre-Teen Circumcision Training Kit (Item No. 1017255 [W44064PT], MPN: LF00911U, Weight: 1.25kg) [BRAND: UNVERIFIED — DO NOT PUBLISH UNTIL CONFIRMED] is a complete hands-on trainer for teaching circumcision technique on pre-teen anatomy to medical students, physicians, and other practitioners.

The trainer reproduces the foreskin, glans penis, frenulum, meatus, and coronal groove in soft, lifelike, pliable material that closely simulates real tissue handling. Trainees can practice dorsal block injection, separation of the preputial epithelium from the glans, surgical removal of the foreskin, and suturing — without the risks of learning on a live patient. The design supports multiple circumcision techniques, including the Mogen clamp, Guillotine clamp, Gomco clamp, Plastibell, dorsal slit, forceps-guided, and sleeve methods, giving trainees exposure to the full range of approaches used across clinical settings.

Circumcision Trainers in this line were developed with input from a leading US medical school and clinicians in South Africa and Indonesia, reflecting practice across different regions and training traditions. [Guessing] verify this claim against your OEM's own product literature before publishing, since I can't independently confirm school/clinician names without a source.

Training applications:

- Dorsal block injection technique
- Preputial epithelium separation from the glans
- Surgical foreskin removal
- Suturing technique
- Multiple clamp/method familiarity (Mogen, Gomco, Guillotine, Plastibell, dorsal slit, forceps-guided, sleeve)
- Patient/family aftercare counseling demonstration

Set includes: 1 base, 6 glans penis cores, 6 foreskins, scalpel, 4-1/2? micro-forceps, 6? precision probe, iris research scissors, 5? straight Halstead mosquito forceps, 5? curved Halstead mosquito forceps, Ethicon suture thread with needle, instrument case, instructions, soft nylon carrying case.

Why Buy from SEM Trainers? SEM Trainers & Systems has supplied medical simulation and clinical skills training equipment to 1,500+ institutions across 28 Indian states for over 30 years, with pan-India delivery and dedicated after-sales support.

FAQ

Q: What circumcision methods can this kit train? A: The kit supports the Mogen clamp, Guillotine clamp, Gomco clamp, Plastibell, dorsal slit, forceps-guided, and sleeve circumcision methods.

Q: How do I order from SEM Trainers? A: Contact sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
