Categories: Airway Management Adult

Product Description

Replacement 3 pack for the Critical Airway Management Trainer (W99836)

The **Replacement Lungs/Stomach** is an essential consumable replacement pack sourced from **Nasco Healthcare, USA**, and distributed in India by SEM Trainers & Systems. This 3-pack is specifically designed for use with the **Critical Airway Management Trainer (W99836)**, ensuring your simulator continues to deliver accurate, lifelike training experiences for airway management and ventilation procedures.

The lungs and stomach components are key functional parts of the airway trainer — simulating realistic resistance during bag-mask ventilation and endotracheal intubation practice. Regular replacement of these components maintains the integrity of the simulation, prevents cross-contamination, and keeps

training sessions consistent and effective.

Ideal for medical colleges, hospital simulation labs, paramedic training centers, and emergency response training programs.

Q1. What is the Replacement Lungs/Stomach used for? A: It is a replacement consumable pack for the Critical Airway Management Trainer (W99836), used to restore the functional lung and stomach components that simulate realistic airway resistance and ventilation during training.

Q2. How many pieces are included in this pack? A: This is a 3-pack — three replacement lungs/stomach components are included per order.

Q3. Which trainer model is this product compatible with? A: It is specifically designed for the Critical Airway Management Trainer, model W99836.

Q4. Who manufactures this product? A: The Replacement Lungs/Stomach is manufactured by **Nasco Healthcare, USA**, a trusted name in medical simulation consumables.

Q5. Why do the lungs/stomach components need to be replaced? A: With repeated use — including bag-mask ventilation, intubation practice, and airway suctioning — these internal components stretch, wear, or become contaminated over time. Replacing them ensures consistent training quality, hygiene, and accurate simulation of real anatomical resistance.

Q6. What is the weight of this product? A: The product weighs 0.002 kg, making it lightweight and easy to store and transport.

Q7. Where can I order this product in India? A: It is available through SEM Trainers & Systems. You can submit an enquiry on their website or reach them at +91-88495 63724 or +91-98791 03905.

Q8. Are there related accessories available for the Critical Airway Management Trainer? A: Yes, related products include the HAL Adult Airway & CPR Trainer, Neck Skin (6 Pieces), Front Teeth Set of 3, and Outer Torso Covering & Face — all available on the SEM Trainers website.
