Categories:Ultrasound

Product Description

Replacement chest for the SONOtrain™ ultrasound trainer chest model P125 / 1019635 with tumors. There are three tumors in the ultrasound material for carrying out realistic punctures and biopsies.

Why Choose the SONOtrain™ Ultrasound Chest Model with Tumors – Spare Chest for Your Training Lab in India?

The SONOtrain™ Ultrasound Chest Model with Tumors – Spare Chest (Item No. 1019650 / XP125) by 3B Scientific is a 0.728 kg replacement chest insert designed for the SONOtrain™ ultrasound trainer chest model with tumors (P125 / 1019635). For radiology departments, breast imaging units, and sonography training centres in India that already own the SONOtrain™ Chest Model with Tumors, this spare part lets you renew the model's tissue block once the original has worn from repeated punctures and biopsies — without buying an entirely new unit.

This spare chest contains three tumors embedded in ultrasound-compatible material, supporting continued practice in locating, targeting, and biopsying solid breast lesions under ultrasound guidance. Replacing the chest insert restores realistic echogenicity and tissue feel to your existing trainer, extending its service life at a fraction of the cost of a full replacement model. Compact and lightweight at 24 x 19 x 8.5 cm and under 1 kg, it's easy to swap in during routine maintenance of your simulation lab equipment.

Why Buy from SEM Trainers?

SEM Trainers & Systems is an authorized distributor of 3B Scientific products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Q: Which model is this spare part for? A: It's a replacement chest specifically for the SONOtrain™ ultrasound trainer chest model with tumors (P125 / 1019635).

Q: What does the spare chest contain? A: Three tumors in ultrasound-compatible material, for realistic puncture and biopsy practice.

Q: What are the dimensions and weight? A: 24 x 19 x 8.5 cm, weighing 0.728 kg.
