SKU:

Categories: Suturing and Bandaging

Product Description

Highly polished stainless steel, 6" L. Box-lock narrow jaw, serrated and indented. Ratchet lock handle.
Why Choose the Mayo Hegar Needle Holder for Your Simulation Lab in India?

The Mayo Hegar Needle Holder (Item No. 1019809, MPN: C00879) is a 0.4 kg, 6-inch highly polished stainless steel surgical needle holder with a box-lock narrow jaw design, serrated and indented jaw faces, and a ratchet lock handle. For surgical skills training programmes, suturing practice labs, simulation centres, and NMC-mandated clinical skills labs in India that need a dedicated needle holder for suturing technique training on simulation trainers, this is the standard instrument used in suturing education — the same design used in clinical suturing that students and trainees must learn correct grip, needle loading, and tissue handling with before performing suturing on real patients.

The Mayo Hegar design combines the needle holder function with integrated scissors capability — the classic combined instrument for both passing sutures and cutting them in the same grip without switching instruments, making it particularly well-suited for episiotomy repair, laceration closure, and general wound closure training. The 6-inch length is the standard size for general surgical and obstetric suturing. The box-lock construction ensures consistent jaw alignment across the full jaw face with repeated use — the quality feature that distinguishes a training instrument used for hundreds of practice sessions from a disposable-grade needle holder. The serrated and indented jaw faces grip suture needles securely without allowing rotation during the needle drive — the critical grip characteristic that correct suturing technique depends on. The ratchet lock handle maintains needle position during the suture drive without requiring sustained grip force.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical simulators and surgical training instruments to 1,500+ institutions across 28 states in India. We provide pan-India delivery and dedicated after-sales support.

Q: What is the length and material of this needle holder? A: 6 inches (? 15 cm), highly polished stainless steel construction.

Q: What suturing training simulators is this instrument compatible with? A: The Mayo Hegar Needle Holder is the standard instrument used across the Life/form® and 3B Scientific suturing trainer ranges — compatible with all suture pad and trainer products in this subcategory.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
