Product Description

The Life/form® Interactive Suture Trainer offers students a true-to-life clinical simulation experience. The trainer attaches easily to a person's or manikin's arm, leg, or hip, allowing practice of suturing techniques in addition to essential communication and patient interaction skills. This convenient, cost-effective kit offers practice at all skill levels, including tying knots, placement of staples, and suturing both superficial and deep wounds. By making their own incisions, the instructor or student is able to determin the depth of suturing and the proper technique to be used. Wounds automatically open when cut. Includes suture pad, attachable pad base with straps, needle holder, suture scissors, tissue forceps, scalpel, soft carrying case, nylon suture, instrument cause and instruction manual. Pad in base

measure 7 x 3 4".

Why Choose the Life/form® Facial Suturing Module Set for Your Simulation Lab in India?

The Life/form® Facial Suturing Module Set (Item No. LF01046) by Nasco Healthcare, USA is a set of portable facial suturing trainers for the repair of complex lacerations to the mouth, nose, ear, and eye — the next-level simulation platform for students who have mastered basic suturing skills on a flat pad and are ready for anatomically challenging, curved-surface repair scenarios that flat pads cannot replicate. For surgical skills training programmes, emergency medicine training, plastic surgery simulation labs, and NMC-mandated clinical skills labs in India where facial laceration repair is a required competency, this is the only dedicated multi-site facial suturing trainer in the Nasco Healthcare catalogue. Backed by a five-year warranty.

Facial lacerations at the mouth, nose, ear, and eye present distinct suturing challenges from standard body-site lacerations: curved anatomical surfaces, proximity to critical structures, cosmetically sensitive tissue, and irregular laceration geometries that require precise needle placement and tension control. Each module trains suturing technique on the specific facial anatomy of its site, with soft lifelike skin that can be cut and stitched many times before replacement is needed. When the skin becomes fully used, it is easily replaced over the permanent core and base — the permanent structure is not consumed, only the skin insert. The instrument set (scalpel, forceps, needle holder, and scissors) is included in a soft case, along with baby powder and one nylon suture, giving trainees everything needed to begin practice immediately. Completely washable and nontoxic — practical for repeated high-volume training sessions.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Q: What facial sites does this set train? A: Mouth, nose, ear, and eye — four anatomically distinct facial laceration repair sites, each on its own dedicated module.

Q: Is the skin replaceable? A: Yes. The soft lifelike skin is replaced over the permanent core and base when fully used — the permanent structure is reusable indefinitely.

Q: What is included and what is the warranty? A: Scalpel, forceps, needle holder, and scissors in a soft case, baby powder, and one nylon suture. Five-year warranty.
