SKU:

Categories: Suturing and Bandaging

Product Description

Includes: lower torso, upper torso, instruction booklet. Individually boxed.

Why Choose the Life/form® Set of 2 Stump Bandaging Simulators for Your Simulation Lab in India?

The Life/form® Set of 2 Stump Bandaging Simulators (Item No. LF01065U, 5.332 kg, 89 × 38 × 25.4 cm) by Nasco Healthcare, USA includes both the Upper Stump and Lower Stump bandaging simulators — the complete pair of post-amputation residual limb trainers for wrapping and bandaging technique practice, individually boxed with an instruction booklet. For nursing colleges, rehabilitation nursing training programmes, orthopaedic nursing simulation labs, and NMC-mandated clinical skills labs in India that need to train both upper and lower limb stump bandaging in a single procurement, this

set provides the complete coverage without sourcing the upper and lower simulators separately.

Post-amputation stump bandaging is a specialised nursing skill — the figure-of-eight and spiral bandaging techniques used on residual limbs require specific tension control and directional wrapping that differs from standard limb bandaging, and incorrect technique can impair prosthetic fitting and residual limb shaping. Practising on a correctly shaped and sized residual limb simulator gives trainees the realistic limb geometry needed to develop correct tension and wrapping pattern habits before performing the skill on real patients. The upper stump trainer represents an above-elbow or below-elbow amputation residual limb; the lower stump trainer represents an above-knee or below-knee amputation residual limb — together covering the four most common amputation sites in clinical nursing practice.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Q: What does this set include? A: One upper limb stump bandaging simulator, one lower limb stump bandaging simulator, and an instruction booklet — each individually boxed.

Q: Can the upper and lower stump simulators be purchased individually? A: Yes. The Upper Stump Bandaging Simulator and Lower Stump Bandaging Simulator are available individually. This set provides both at a single combined purchase.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
