Product Description

Replacement chest for SONOtrain™ Breast Model with Cysts P124 / 1019634 Realistic reproduction of

a breast made from ultrasound material with two cysts for realistic punctures and aspirations.
Why Choose the SONOtrain™ Ultrasound Chest Model with Cysts – Spare Chest for Your Training Lab in India?

The SONOtrain™ Ultrasound Chest Model with Cysts – Spare Chest (Item No. 1019649 / XP124) by 3B Scientific is a 0.928 kg replacement chest insert designed for the SONOtrain™ Breast Model with Cysts (P124 / 1019634). For radiology departments, breast imaging units, and sonography training centres in India that already own the SONOtrain™ Breast Model with Cysts, this spare part lets you renew the model's tissue block once the original has worn from repeated punctures and aspirations — without buying an entirely new unit.

This spare chest is a realistic reproduction of a breast made from ultrasound-compatible material, containing two cysts to support continued practice in locating, puncturing, and aspirating cystic lesions under ultrasound guidance. Replacing the chest insert restores realistic echogenicity and tissue feel to your existing trainer, extending its service life at a fraction of the cost of a full replacement model. Compact and lightweight at 24 x 19 x 8 cm and under 1 kg, it's easy to swap in during routine maintenance of your simulation lab equipment.

Why Buy from SEM Trainers?

SEM Trainers & Systems is an authorized distributor of 3B Scientific products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.
