SKU:

Categories: Ultrasound

Product Description

Replacement block for the ultrasound trainer SONOtrain™ gallbladder model P122 / 1019638 with three gallbladders with different pathologies:

- Gallstones (diameter: 8 and 10 mm)
- Thickened gallbladder wall
- Sludge

The gallstones and the sludge in the gallbladder model can move around and react to changes in position.
Why Choose the SONOtrain™ Ultrasound Gall Bladder Model – Spare Block for Your Training Lab in India?

The SONOtrain™ Ultrasound Gall Bladder Model – Spare Block (Item No. 1019653 / XP122) by 3B Scientific is a replacement insert designed for the SONOtrain™ ultrasound gallbladder trainer (P122 / 1019638). For radiology departments, emergency medicine training centres, and sonography schools in India that already own the full gallbladder trainer, this spare block lets you renew the tissue insert once the original has worn from repeated scanning — without buying an entirely new unit.

This spare block contains three gallbladders, each demonstrating a different pathology: gallstones measuring 8 mm and 10 mm in diameter, a thickened gallbladder wall, and a biliary sludge deposit — covering the most common findings trainees need to recognise on real-world scans. As with the original model, the gallstones and sludge are not fixed in place; they move and react realistically as the model is repositioned. Replacing the block restores realistic echogenicity and tissue feel to your existing trainer, extending its service life at a fraction of the cost of a full replacement model.

Why Buy from SEM Trainers?

SEM Trainers & Systems is an authorized distributor of 3B Scientific products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Q: Which model is this spare part for? A: It's a replacement block specifically for the SONOtrain™ ultrasound gallbladder model (P122 / 1019638).

Q: What pathologies are represented in this block? A: Two gallstones (8 mm and 10 mm), a thickened gallbladder wall, and biliary sludge — all of which move realistically with repositioning.

Q: What are the weight and dimensions? A: Not specified on the source page — please confirm with the manufacturer/brochure before publishing, or omit this spec row.
