Product Description

Replacement block for the SONOtrain™ ultrasound vein model P120 / 1019637 Ultrasound block with three blood vessels with diameters of 4, 8 and 15 mm with adjustable fluid flow. Punctures and injections possible, and self-closing injection channels.

Why Choose the SONOtrain™ Ultrasound Vein Model – Spare Block for Your Training Lab in India?

The SONOtrain™ Ultrasound Vein Model – Spare Block (Item No. 1019652 / XP120) by 3B Scientific is a 2.132 kg replacement insert designed for the SONOtrain™ ultrasound vein trainer (P120 / 1019637). For nursing skills labs, anaesthesia and critical care training centres, and ultrasound training programmes in India that already own the full vein access trainer, this spare block lets you renew the tissue insert once the original has worn from repeated punctures — without buying an entirely new unit.

This spare block contains three blood vessels with diameters of 4 mm, 8 mm, and 15 mm, with adjustable fluid flow, allowing trainees to continue practising locating and accessing vessels of varying size under ultrasound guidance. The block supports repeated punctures and injections thanks to self-closing injection channels, extending its usable life without compromising realism. Replacing the block restores realistic detection and tissue feel to your existing trainer, extending its service life at a fraction of the cost of a full replacement model.

Why Buy from SEM Trainers?

SEM Trainers & Systems is an authorized distributor of 3B Scientific products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Frequently Asked Questions

Q: Which model is this spare part for? A: It's a replacement block specifically for the SONOtrain™ ultrasound vein model (P120 / 1019637).

Q: What vessel sizes are included? A: Three vessels of 4 mm, 8 mm, and 15 mm diameter, with adjustable fluid flow.

Q: Can the block be reused after multiple punctures? A: Yes. It features self-closing injection channels that allow repeated punctures and injections.

Q: What is the weight? A: 2.132 kg.
