SKU:

Categories:Auscultation

Product Description

Why Choose the PAT Pediatric Auscultation Trainer Storage/Carry Case for Your Simulation Lab in India?

The PAT Pediatric Auscultation Trainer Storage/Carry Case with wheels and handle (Item No. 1020110, Brand: Cardionics, MPN: 236-8001, 14.2 kg) is the dedicated transport and storage solution for the PAT and PAT BASIC® pediatric auscultation trainer systems. For institutions running mobile skills labs, off-site training camps, or simply needing to move the trainer between classrooms and secure storage, this wheeled case protects the manikin, SimScope stethoscope, and accessories from the transport damage that voids OEM warranties and disrupts scheduled training sessions.

Built with wheels and a telescoping handle, the case is designed for one-person transport without requiring the trainer to be carried by hand — a meaningful consideration given the PAT trainer systems themselves weigh in the 4–15 kg range depending on configuration. Institutions running PAT or PAT BASIC across multiple campuses, or lending equipment between departments, will find this case reduces handling risk during transit.

For nursing colleges and MBBS clinical skills labs in India that have invested in a PAT or PAT BASIC auscultation trainer, this case is the recommended companion purchase to protect that investment during storage and transport.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Cardionics products in India with over 30 years of experience supplying medical simulators and auscultation training accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: Is this compatible with both PAT and PAT BASIC? A: Yes — it's the storage/carry case for the PAT pediatric auscultation trainer line, covering both PAT and PAT BASIC configurations.

Q: Does it include wheels for transport? A: Yes — wheels and a handle are built in for single-person transport without manual carrying.

Q: Is the trainer itself included? A: No — this is the case only. The PAT or PAT BASIC trainer is purchased separately.
