SKU:

Categories: Auscultation

Product Description

for W44122 This set includes 4 ears which allow observation of the following pathologies:

- Chronic otitis media with large perforation
- Attic cholesteatoma (A)
- Attic cholesteatoma (B)
- Atelectatic middle ear otitis and tympanosclerosis

Supplementary Ears — Otoscopic Pathology Training Set for W44122 Ear Examination Simulators

The Supplementary Ears set (Item No. LF01020U, 0.29 kg, 19.5 × 16 × 4.5 cm) by Nasco Healthcare,

USA is built for the W44122 ear examination simulator, adding four additional pathology-specific ear inserts for otoscopy training. This lets students practice recognizing conditions beyond what the base simulator ships with, without needing a separate simulator unit.

Pathologies covered in this set:

- Chronic otitis media with large perforation
- Attic cholesteatoma (presented in two variant appearances, A and B)
- Atelectatic middle ear otitis with tympanosclerosis

For ENT training modules in medical and nursing curricula, this set expands otoscopic diagnosis practice to cover common middle-ear pathologies students need to recognize during clinical postings — particularly useful for building pattern recognition across variations of the same underlying condition (as with the two cholesteatoma presentations included here).

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and auscultation training accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: Which simulator does this fit? A: It's built for the W44122 ear examination simulator. Confirm your existing simulator model with our team before ordering.

Q: Why are there two cholesteatoma inserts? A: They represent two different visual presentations (A and B) of attic cholesteatoma, helping students learn to recognize the condition across its range of appearances rather than a single fixed image.
