Product Description

Each kit contains 15 location labeled patches.

SimScope® Patch Kit — Auscultation Site Patches for SimScope Trainers in India

The SimScope® Patch Kit (Item No. 1020103, MPN: 317-3400) by Cardionics, USA includes 15 location-labeled patches used with the SimScope® wireless stethoscope system. Each patch marks a specific auscultation site on SAM Basic, PAT Basic, or other SimScope-compatible auscultation manikins, so students can consistently locate heart, lung, bowel, and bruit sites during stethoscope placement practice.

These patches are a consumable — labs running frequent hands-on sessions with SimScope-based

trainers will need to replace them periodically as adhesive wears from repeated student use, making this a practical restock item for institutions maintaining an active auscultation training programme.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of Cardionics products in India with over 30 years of experience supplying medical simulators and auscultation training accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: What is this patch kit used for? A: The 15 location-labeled patches mark auscultation sites on SimScope-compatible trainers, helping students correctly identify and place their stethoscope at the right anatomical location during practice.

Q: How often do these need replacing? A: As a consumable accessory, patches typically need periodic replacement in labs with high student throughput, once adhesive wears from repeated handling.

Q: Which manikins is this compatible with? A: SimScope-based auscultation trainers (e.g., SAM Basic, PAT Basic). Confirm your specific model with our team before ordering.
