Product Description

for W49400 / 1005584 Additional stethoscope sounder are available to allow multiple students to auscultate at the same time. The sounders link one after another and allow students to listen using their own stethoscopes.

Stethoscope Sounders — Multi-Student Auscultation Accessory for W49400 Heart & Lung Sound Simulators

The Stethoscope Sounders (Item No. 1005892 [W49430], MPN: SS-10, 0.09 kg) by Nasco Healthcare, USA are compatible with the W49400 (Item No. 1005584) heart and lung sound simulator, letting multiple students auscultate the same simulated sound source at the same time using their own personal stethoscopes.

How it solves group auscultation training. Instead of students taking turns with a single stethoscope on the simulator, additional Stethoscope Sounders link one after another, so several students can each place their own stethoscope and listen simultaneously. This is a practical fit for skills labs running whole-class or small-group auscultation demonstrations, where waiting in line for a single stethoscope wastes classroom time.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and auscultation training accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: Which simulator is this compatible with? A: It's built for the W49400 (Item No. 1005584) heart and lung sound simulator. Confirm your existing simulator's item number with our team before ordering.

Q: How many students can auscultate at once? A: Multiple Stethoscope Sounders can be linked one after another, so the number of simultaneous listeners scales with how many units you order.

Q: Do students need their own stethoscopes? A: Yes — each Stethoscope Sounder lets one student listen using their own personal stethoscope.
