Product Description

Why Choose the Congenital Heart Disease Sound Menu for Your Simulation Lab in India?

The Congenital Heart Disease Sound Menu (Item No. 1005891 / W49420, MPN: ST2M-113, 0.07 kg) by Nasco Healthcare, USA is a 16-sound auscultation card for the W49407 simulator, covering the congenital cardiac lesions most commonly taught in pediatric cardiology and pediatric nursing curricula.

The card covers atrial and ventricular septal defects, patent ductus arteriosus, the Blalock-Taussig shunt flow pattern, mitral valve prolapse and hypertrophic cardiomyopathy under both resting and Valsalva-maneuver conditions, discrete subaortic stenosis, bicuspid aortic valve regurgitation, pulmonary stenosis, Ebstein's anomaly, and coarctation of the aorta with combined AS/AR at two

severities. This gives pediatric and cardiology training programs a focused congenital-disease curriculum distinct from the adult-acquired pathology covered in cards like Aortic Regurgitation or Basic Murmurs.

For labs also using our Cardiomyopathies Sound Menu, note that both cards touch on HCM — this card covers it briefly within the congenital-disease context, while the Cardiomyopathies card goes into much greater depth on dynamic maneuver interpretation.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and auscultation training accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: Is this different from the Cardiomyopathies Sound Menu? A: Yes — this card covers a broad range of congenital lesions with brief HCM coverage. The Cardiomyopathies card focuses specifically and in depth on HCM dynamic maneuver interpretation.

Q: Which simulator is this compatible with? A: The W49407 auscultation simulator by Nasco Healthcare.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.

Congenital Heart Disease Sound Menu - Auscultation Sounds for W49407

1. Atrial septal defect
2. Atrial septal defect
3. Ventricular septal defect
4. Ventricular septal defect
5. Patent ductus arteriosus
6. Blalock - taussig
7. Mitral prolapse control
8. Mitral prolapse valsalva
9. HCM control
10. HCM valsalva
11. Discrete subaortic stenosis
12. AR (bicuspid valve)
13. Pulmonary stenosis
14. Ebstein's anomaly
15. Coarct AS/AR (severe)
16. Coarct AS/AR
