CCU/ICU Sound Menu

Item No. 1018184 [W49411]

Weight 0.07kg

Dimensions 16 x 7 x 2 cm

MPN: ST2M-41

SKU:

Categories:Auscultation

Product Description

This confirms the "CCU/ICU I" naming question from last time, and hands me a clean, unambiguous data error to flag — the source literally duplicates items 13–16.

[Cert] This is the base card in the series — titled plainly "CCU/ICU Sound Menu" (Item No. 1018184 / W49411, MPN: ST2M-41), which is what "CCU/ICU II" and "CCU/ICU III" are numbered against. No "I" suffix needed; this one implicitly is the first.

[Cert] The source description literally repeats items 13–16 twice — "13. PVCs amid ST / 14. Ventricular tachycardia / 15. PVCs, VT – torsades / 16. Ventricular fibrillation" appears once, then the identical four lines appear again immediately after. That's a straightforward copy-paste duplication in the

WooCommerce source, not a real 20-sound card labeled as 16. I'm listing the 16 distinct items once, as intended, and flagging the underlying page for correction rather than reproducing the duplication.

I disagree with treating this as a minor formatting quirk. Here's what I'd do instead: fix the WooCommerce description directly — delete the repeated block — because as it stands the live page currently displays a confusing 20-line list under a "16 sounds" product, which is the kind of internal inconsistency that erodes trust in a clinical buyer's eyes just as much as a wrong clinical term would.

Why Choose the CCU/ICU Sound Menu for Your Simulation Lab in India?

The CCU/ICU Sound Menu (Item No. 1018184 / W49411, MPN: ST2M-41, 0.07 kg, 16 × 7 × 2 cm) by Nasco Healthcare, USA is the foundational 16-sound critical care auscultation card for the W49407 simulator — the entry point into SEM Trainers' CCU/ICU series, which extends further with CCU/ICU II and CCU/ICU III for more advanced rhythms.

The card progresses through a clinically structured sequence: normal sinus rhythm as a baseline, sinus bradycardia, atrial premature complexes, atrial tachycardia (SVT), variable atrial flutter, atrial fibrillation, supraventricular tachycardia and rhythm variants, first-, second-, and third-degree AV block (including junctional escape rhythm), premature ventricular contractions amid sinus tachycardia, ventricular tachycardia, torsades de pointes, and ventricular fibrillation. This gives CCU/ICU nursing and residency programs a complete first-tier arrhythmia recognition curriculum before progressing to the rarer rhythms covered in CCU/ICU II and III.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and auscultation training accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: How does this relate to CCU/ICU II and III? A: This is the foundational card in the series. CCU/ICU II and III progressively add more advanced and less common critical care rhythms.

Q: Which simulator is this compatible with? A: The W49407 auscultation simulator by Nasco Healthcare.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.

CCU/ICU Sound Menu - Auscultation Sounds for W49407

1. Normal sinus rhythm
2. Sinus bradycardia
3. Atrial premature complexes
4. Atrial tachy (SVT)
5. Atrial flutter, variable
6. Atrial fibrillation
7. SV tachycardia
8. SV rhythm
9. 1st AV block, IVCD
10. 2nd AV, wide QRS
11. 2nd AV block - II, 2:1
12. 3rd AV block, JER
13. PVCs amid ST
14. Ventricular tachycardia
15. PVCs, VT - torsades
16. Ventricular fibrillation

Ventricular fibrillation
