Product Description

The Life/form Infant Auscultation Trainer simulates heart, bowel, and lung conditions selected by the instructor via wireless remote control. The student must palpate to identify the correct auscultation site and will hear different heart, bowel and lung sounds as the SmartScope is moved from site to site. The instructor can program the remote control, selecting from two dozen conditions and even switch conditions so the students can compare and make a diagnosis. Includes Infant Auscultation Trainer,

SmartScope, remote and hard carry case. Infant remote and SmartScope are not compatible with Adult Auscultation Trainer Why Choose the Infant Auscultation Trainer for Your Simulation Lab in India? The Infant Auscultation Trainer from 3B Scientific is a trusted training tool used across simulation labs in India for hands-on pediatric auscultation practice. This simulator helps medical students and healthcare professionals build critical competencies in a safe, controlled environment — fully aligned with NMC's Competency-Based Medical Education (CBME) guidelines for mandatory clinical skills training. Who Is This Simulator Ideal For? This product is recommended for medical colleges setting up OSCE stations, nursing institutions, and hospitals building clinical skills laboratories as per NMC guidelines. Whether you are setting up a new simulation lab or upgrading your existing facility, the Infant Auscultation Trainer offers an excellent balance of realism, durability, and training value.
