SKU:

Categories:Auscultation

Product Description

This self-contained heart and lung sound generator delivers site-specific heart and lung sounds typical of a four-year old child. Use any stethoscope in the normal auscultation site for pediatric assessment to listen as then lung speakers and heart speakers mimic actual sounds. The unit can be run from either a conventional PC using your mouse and monitor, or through the special handheld remote. An external speaker jack allows you to broadcast sounds to the entire classroom, or you can use it for audible testing of more than one student at a time. Classroom broadcasts of speakers/sounds in specific locations allow students to hear precise sound anomalies encountered when they auscultate the manikin. No programming required. Simply plug in, attach your USB mouse and monitor cable, and

point and click your way to student excellence in lung and heart sound knowledge.

Why Choose the Child Heart & Lungs Sound Trainer for Your Simulation Lab in India?

The Child Heart & Lungs Sound Trainer (Item No. 1017237 / W44744, 3.405 kg) is a self-contained heart and lung sound generator that reproduces site-specific auscultation findings typical of a four-year-old child. Students use a standard stethoscope at normal pediatric auscultation sites while integrated heart and lung speakers reproduce realistic sounds — no special stethoscope or sensor equipment required on the student side.

The unit can be operated via computer (mouse-driven, no programming needed) or through a dedicated handheld remote, and includes an external speaker jack so an entire classroom can hear the sound being demonstrated, or so multiple students can be tested audibly at the same time. This makes it well suited to pediatric nursing and medical training programs that need to teach age-specific auscultation findings — pediatric heart and lung sounds differ meaningfully from adult presentations, and this unit is purpose-built around that four-year-old baseline.

Please confirm before ordering: exact hardware included (PC, monitor, mouse) and the significance of the three part numbers listed for this item — SEM Trainers can confirm current specifications with the manufacturer.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of leading pediatric simulation training equipment in India, with over 30 years of experience supplying medical simulators and auscultation training accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: Do I need to supply my own computer and monitor? A: This depends on the exact configuration — please confirm with SEM Trainers whether a PC/monitor/mouse are included or need to be sourced separately.

Q: What age group is this designed for? A: Sounds are modeled on a typical four-year-old child, supporting pediatric-specific auscultation training.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing, availability, and full hardware specifications.
