SKU:

Categories:Auscultation

Product Description

SAM Online is an interactive online auscultation training platform that gives students and instructors access to an extensive simulated sounds library, lesson guides for over 60 conditions and tools to chart the learning progress. The comprehensive sound library and the instructor aid make SAM Online suitable for every level of auscultation training. Good to know: The heart sound frequency ranges from

20 to 650 Hertz, breath sounds range between 70 to 2000 Hertz. We recommend high quality headphones or speakers for listening to the auscultation sounds for best training outcomes.

Auscultation training at any time and wherever you are Whether you are teaching auscultation to a class in person or remotely, SAM Online provides a central platform for instructors and teachers to create lessons tailored to their curriculum. The platform also includes a training management system to track students' progress at any time. All features for instructors at a glance:

- Online library of over 80 simulated auscultation sounds (heart, lung, bowel and bruit)
- Includes corresponding phonocardiograms and ECG waveforms for every heart sounds
- Comes with prepared lesson guides for students
- Instructors can upload custom assignments curated to their curriculum
- Large library of prepared quizzes that can easily be edited
- Entire tests can be created inside the system including grade settings and due dates
- Includes a course planning and teacher and classes collaboration tool to streamline auscultation training for entire institutions
- Easily share information with your class or individual students via the Student Organizer
- Includes large Arrhythmia library

Easy to follow auscultation training to streamline students' learning curves Students receive an easy to use application to practice the theory of auscultation outside the classroom. The interactive auscultation model allows them to train correct placement of stethoscopes (front and back, anatomically correct) and select the specific sounds they want to learn. All features for students at a glance:

- Lesson guides include all basic information they need to learn to understand the different auscultation sounds
- Students receive assignments from their teachers and easy to follow instructions
- Students receive tailored quizzes from their teachers and can take random quizzes to test their knowledge
- Students can take auscultation exams remotely or in class, seeing their time remaining and instantly receiving grades upon completion of the (standardized) tests
- Students can check their learning progress inside their grading book (also shows pending assignments yet to be completed)
- Students see the defined syllabus to check specific course expectations and responsibilities
- Students can train with the Arrhythmia tool

Altogether, SAM Online is more than an auscultation training platform; it is an entire training management system which is very well thought through for both teachers and students alike.

About Lesson Guides and the Arrhythmia Program: Comprehensive Lesson Guides Included with each condition is a thorough lesson guide outlining the nuances and causes of each sound. Complete with diagrams and phonocardiogram descriptions, these lesson guides provide

comprehensive instruction of auscultation analysis — leading to reinforced concepts by the student.

Arrhythmia Program SAM Online includes an additional program for learning arrhythmias. With nearly 30 of the most common arrhythmias, this program offers in-depth explanations of the ECG waveforms and descriptions of each condition’s clinical significance and treatment plan. Learning progress can be tracked with the novice or advanced level quizzes. **Delivery content:** The institutional license to SAM Online Auscultation Training System includes:

- 1 admin license
- 5 teacher licenses
- 200 student licenses

Additional licenses can be added at any time to expand the platform. Please note: The SAM Online institutional license comes complimentary for one year with the purchase of a [SAM 3G](#) or [SAM II](#) adult auscultation trainer, a [PAT](#) pediatric auscultation trainer, a [SimShirt](#) Auscultation Simulator, or a [Bionic Hybrid Auscultation Simulator](#).

SAM Online® Auscultation Training System — E-Learning Platform for Medical & Nursing Institutions in India

SAM Online® (Item No. 8000918, MPN: 717-9001) by Cardionics, USA is a cloud-based auscultation training platform available to SEM Trainers customers as an Institutional License (1 year). Unlike SAM 3G, SAM II, or PAT — which require a manikin and stethoscope hardware setup — SAM Online is a pure software platform: no auscultation sites, no physical stethoscope needed. Students and instructors access an 80+ sound library (45 heart, 25 lung, 16 bowel, 6 bruit sounds), each paired with a phonocardiogram, directly through a browser.

Built for institutional-scale teaching, not individual practice. The license bundle includes 1 admin login, 5 teacher logins, and 200 student logins — sized for a full class or department rather than a single lab station. Teachers get lesson guides for 60+ conditions, a quiz and test builder with grading, an assignment and syllabus manager, and a nearly 30-condition Arrhythmia Program with novice and advanced quizzes. Students get self-paced lesson guides, remote or in-class timed exams with instant grading, and a personal progress gradebook. For institutions running hybrid or remote clinical skills training, this closes the gap between classroom auscultation demonstration and independent student practice.

Two ways to get it. SAM Online can be purchased as its own line item (Item No. 8000918), or it comes complimentary for the first year with the purchase of a SAM 3G, SAM II, or PAT auscultation manikin, a SimShirt Auscultation Simulator, or a Bionic Hybrid Auscultation Simulator — worth checking before ordering standalone if your institution is also budgeting for manikin hardware this

cycle. It can also be connected to the SEM Trainers speaker system (Item No. 1021753) for group instruction in a lecture hall setting.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of Cardionics products in India with over 30 years of experience supplying medical simulators and auscultation training accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support, including guidance on institutional license setup and additional license expansion.

Q: Do we need a SAM manikin or stethoscope to use SAM Online? A: No — SAM Online is entirely software-based. No manikin, auscultation sites, or physical stethoscope are required to access the sound library or lesson content.

Q: What's included in the Institutional License? A: 1 admin license, 5 teacher licenses, and 200 student licenses for one year, with the option to add more licenses later as enrolment grows.

Q: Can we get SAM Online for free? A: It's complimentary for one year with the purchase of a SAM 3G, SAM II, or PAT auscultation trainer, a SimShirt Auscultation Simulator, or a Bionic Hybrid Auscultation Simulator. It's also available as a standalone purchase.

Q: Can multiple students use it during a lecture? A: Yes — SAM Online can be connected to a compatible speaker system for group instruction, in addition to individual remote access.
