AURiS Simulation Stethoscope for Auscultation Training

Item No. 1022744
Weight 0.463kg
Brand iSimulate
MPN: H-AURIS

[Read More](#)

SKU:

Categories:Auscultation

Product Description

AURiS is a simulation stethoscope for realistic auscultation training. It functions as a hybrid simulator and can be used with both a standardized patient and a manikin. The sounds library is controlled remotely inside the AURiS auscultation training app. AURiS uses advanced sensor technology paired with the in-app sounds library that includes heart, lung, bowel and bruit sounds in an easy to use

instructor interface. The AURiS training stethoscope will only play the selected sounds when placed on a body. When placed on a body, a sensor activates the sound file selected by the instructor and the student instantly hears the sound through the training stethoscope. Instructors operate the AURiS Software by connecting the stethoscope to a mobile device (iOS) via Bluetooth. The setup is done by simply pairing the app with AURiS, which then automatically calibrates the stethoscope. The stethoscope is wireless and receives sounds at a range of up to 10 meters (30 feet). With the easy to use instructor interface, AURiS can be used on manikins and standardized patients to increase simulation fidelity. The system comes packaged with the training stethoscope to be paired with the AURiS app, including multiple heart, lung and bowel sounds. **AURiS Auscultation Training Features:**

- Simulates a real stethoscope
- Wireless connection
- Auscultation Training App
- 22 heart and 13 lung sounds
- Bruits and bowel sounds
- Create patient scenarios with ease
- Add sounds to the file
- Adjust volume remotely
- Adjustable settings
- Works with iOS

Delivery content:

- AURiS training stethoscope simulator
- AURiS storage bag

Why Choose the AURiS Simulation Stethoscope for Your Simulation Lab in India?

The AURiS Simulation Stethoscope (Item No. 1022744, Brand iSimulate, MPN: H-AURIS, 0.463 kg) is a wireless hybrid simulation stethoscope for realistic auscultation training on both standardized patients and manikins. Unlike patch-based systems, AURiS uses sensor technology that only plays a sound when the stethoscope is correctly placed on the body — the instructor selects the sound from the app, and the student hears it exactly when and where the stethoscope should detect it, reinforcing correct technique in real time.

The system connects wirelessly to an iOS device via Bluetooth (10-meter/30-foot range), with the instructor controlling sound selection, scenario building, and volume remotely through the AURiS app. The library includes 22 heart sounds, 13 lung sounds, plus bowel and bruit sounds — enough breadth to build varied patient scenarios without switching hardware.

For simulation centres, OSCE programmes, and NMC-mandated skills labs in India already running an

iOS-based simulation workflow, AURiS adds a lightweight, portable auscultation training option that pairs well with standardized patient programmes.

Features:

- Simulates a real stethoscope, wireless Bluetooth connection
- 22 heart sounds, 13 lung sounds, plus bruits and bowel sounds
- Instructor app for building custom patient scenarios
- Remote volume and setting adjustment
- Works with iOS devices only

What's included: AURiS training stethoscope simulator, AURiS storage bag.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of leading simulation training brands in India, with over 30 years of experience supplying medical simulators and auscultation training accessories to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: Does this work with Android tablets or Windows devices? A: No — the AURiS app currently requires iOS. Confirm you have or are prepared to acquire a compatible iPhone/iPad before ordering.

Q: What's included in the box? A: The AURiS training stethoscope and a storage bag. An iOS device to run the app is not included.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
