Product Description

for W30508

Why Choose the Synthetic Skin for the Body (Skin-Coloured) for Your Simulation Lab in India?

The Synthetic Skin for the Body, Skin-Coloured (Item No. 1005399 / W30512, MPN: M167 Spare part 01) is a 1 kg replacement body skin consumable measuring 46.5 × 40 × 18 cm, designed exclusively for use with the Endotracheal Intubation Simulator (W30508). The body skin is the outer surface layer of the W30508 simulator — it provides the tissue resistance, surface landmark feel, and tactile realism that trainees must work against during intubation training. The skin-coloured variant matches the standard anatomical presentation of the simulator's torso. When the body skin degrades from repeated training use — surface cracking, loss of elasticity, or permanent deformation from repeated

laryngoscope and device insertions — it must be replaced to restore the correct tissue feel that makes intubation technique training clinically meaningful.

The body skin is a distinct consumable from the front teeth (W30510) and the silicone oil lubricant (W30513) for the same simulator — each degrades independently on its own replacement schedule. The skin's 1 kg weight and 46.5 × 40 × 18 cm dimensions reflect its role as a full outer covering for the W30508 torso — not a small insert. For simulation labs running regular intubation training sessions with multiple trainees, maintaining a stock of W30512 skin ensures the W30508 simulator can be returned to full training condition without ordering delays. Only genuine OEM W30512 material is guaranteed to fit the W30508 simulator with correct dimensions, correct surface compliance, and correct tissue resistance. The MPN M167 Spare part 01 confirms this is the primary body skin consumable for the M167/W30508 simulator platform.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of medical simulation products in India with over 30 years of experience supplying medical simulators and genuine OEM consumables to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: Which simulator is this body skin compatible with? A: W30512 is designed exclusively for the Endotracheal Intubation Simulator (Item No. W30508 / M167). It is not compatible with other simulator models.

Q: Is this the same as the front teeth (W30510) or the silicone oil (W30513) for the same simulator? A: No. These are three separate consumables for the W30508 simulator, each with its own replacement schedule. W30512 is the outer body skin; W30510 is the front teeth set of 3; W30513 is the silicone oil lubricant. All three should be stocked independently.

Q: How do I order and get support from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724. We supply genuine simulator consumables with pan-India delivery.
