SKU:

Categories: Airway Management Adult

Product Description

The thorax is used as a replacement part for intubation torso W45156.

Why Choose the Thorax for Intubation Torso for Your Simulation Lab in India?

The Thorax for Intubation Torso (Item No. 1013685 / W99999-759, MPN: S315.100.898) by Gaumard Scientific, USA is a 0.401 kg genuine OEM replacement thorax component for the HAL® Adult Intubation Torso (W45156) — the intubation torso used with the Gaumard HAL® Adult Airway and CPR Trainer family, specifically compatible with the HAL® Adult Multipurpose Airway and CPR Trainer (S315.100 / 1019856). The thorax is the structural chest component that provides the correct surface anatomy — sternum, rib cage geometry, and chest landmark positions — that CPR hand placement training and airway management positioning depend on. When the thorax degrades or is damaged

from high-frequency CPR training use, it must be replaced with the genuine OEM part to restore correct chest geometry and anatomical landmark accuracy.

The MPN suffix .898 identifies this as a designated Gaumard spare part for the S315.100 platform. Only genuine OEM W99999-759 material is guaranteed to fit the HAL® intubation torso assembly with correct dimensional tolerances and correct surface compliance. For simulation labs in India running regular CPR and airway training sessions on the HAL® Adult platform, maintaining availability of this spare part prevents extended trainer downtime when thorax replacement is required. The 0.401 kg weight reflects this as a structural component rather than a consumable — it is a replacement part, not a high-turnover consumable like lungs or stomach, and is ordered on a repair rather than regular stocking basis.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Gaumard Scientific products in India with over 30 years of experience supplying medical simulators and genuine OEM spare parts to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: Which HAL® simulator is this thorax compatible with? A: W99999-759 (MPN: S315.100.898) is a replacement thorax for the HAL® Adult Intubation Torso (W45156), used with the Gaumard HAL® Adult Airway and CPR Trainer family. Confirm compatibility with your specific HAL® configuration before ordering.

Q: Is this a consumable or a structural replacement part? A: This is a structural replacement part — not a high-turnover consumable. It is ordered on a repair basis when the thorax is damaged or degraded, not as a routine stock item.

Q: How do I order and get support from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724. We supply genuine Gaumard Scientific spare parts with pan-India delivery.
