Adult Deluxe Airway Management Trainer

Item No. 101-502U
Weight 5kg
Dimensions 61 x 22.9 x 30.5 cm
Make: Nasco Healthcare, USA

SKU:

Categories:Airway Management Adult

Product Description

Adult Deluxe Airway Management Trainer is the only head of its kind. More lifelike feel than older styles. Material stretches more than human skin, will not be damaged by aggressive intubation, very flexible tongue, and vocal cords reside in a neutral position. This adult airway maintenance head utilizes the very lifelike skin taken from the STAT Baby. The lifelike feel and an anatomy emphasizing accurate visualization features makes this trainer the choice for advanced airway management with the convenience of board mounting. Features include laryngospasm and tongue edema. Both lungs and stomach are visible for easy determination of successful intubation. All the anatomical landmarks are shown and the vocal cords are highlighted for easy viewing. The upper teeth break out if inappropriate technique is applied during intubations. The board is anchored to surfaces by suction cup feet. The cricoid area replacement skin allows for an economical way to teach and practice surgical airway techniques. All of the standard adjuncts for airway maintenance work in this model. This head is also

available without the board to use as a replacement for your STAT and PDA STAT heads. Carotid pulses are only included with the model for the STAT manikins.

Why Choose the Life/form® Adult Deluxe Airway Management Trainer for Your Simulation Lab in India?

The Life/form® Adult Deluxe Airway Management Trainer (Item No. 101-502U / 1018851) by Nasco Healthcare, USA is the most lifelike adult airway training head in the Life/form® Airway Management Trainer family — 5 kg, 61 × 22.9 × 30.5 cm, male head board-mounted on suction-cup feet. It is the only configuration in the family built specifically for cricothyrotomy and surgical airway management training, and the only one with a replaceable cricoid area skin that enables repeated surgical airway technique practice at low consumable cost. The skin material is derived from the STAT Baby platform and is unique in the family: it stretches beyond human skin elasticity, resists damage from aggressive intubation that would permanently deform other trainer skins, and returns to neutral position after compression — making it the right choice for high-volume simulation labs where multiple trainee cohorts use the same trainer and skin longevity directly impacts operating cost.

Three features position this trainer distinctly from the rest of the Life/form® Airway Management Trainer family. The ultra-lifelike, durable skin provides the most realistic tissue feel available in this product range, with a very flexible tongue and vocal cords resting in a neutral position that accurately represents what trainees will encounter clinically. The breakout upper teeth introduce a direct consequence for incorrect laryngoscopy technique — if the trainee levers against the upper teeth rather than applying correct blade lift technique, the teeth disengage, providing immediate corrective feedback that no verbal instruction alone achieves. The replaceable cricoid area skin makes this the only configuration where surgical cricothyrotomy and needle cricothyrotomy can be practised repeatedly with anatomically correct cricoid and cricothyroid membrane presentation, replaceable at minimal consumable cost. Laryngospasm and tongue oedema are present for difficult airway recognition training; both lungs and stomach are visible for immediate oesophageal versus tracheal intubation determination. All standard airway adjuncts function on this model. The board is mountable on any flat surface via suction cup feet. This head is also available without the board as a replacement head for STAT and PDA STAT manikins — carotid pulses are included only in the STAT manikin version.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What makes this trainer's skin different from other Life/form® airway trainers? A: The skin is

derived from the STAT Baby platform — it stretches more than human skin, resists permanent damage from aggressive intubation technique, and is the most lifelike material available in the Life/form® adult airway trainer range. It will not be damaged by repeated aggressive intubation sessions that would degrade conventional trainer skins.

Q: Can surgical cricothyrotomy be practised on this trainer? A: Yes. The replaceable cricoid area skin enables repeated needle and surgical cricothyrotomy training with anatomically correct landmark presentation. This is the only configuration in the Life/form® Airway Management Trainer family with this capability.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.

	Head/torso	Ideal for	Digital intubation	Laryngospasm & Tongue edema	Stomach rise	Sucti-oning	Jaw thrust	Manual carotid pulse	E.T., E.O.A., P.T.L, L.M.A., Combitube®, and King System insertion	Additional features
